Introduction

The Sage Library System is transitioning away from the old cataloging standard AACR2 and fully adopting the RDA cataloging standard. RDA was created in 2010 and formally adopted by the Library of Congress in 2013. A very large portion of all items imported into Evergreen are already cataloged in RDA, especially if the item was published since 2013.

What is RDA?

RDA (Resource Description and Access) is a content standard for descriptive cataloging providing instructions and guidelines for bibliographic data based on FRBR (Functional Requirements for Bibliographic Resources) and FRAD (Functional Requirements for Authority Data) for producing the description, name and title access points representing a resource. RDA replaces AACR2 and is a more flexible framework providing the ability to describe new types of material, is readily adaptable to new and evolving database networks, and is compatible with existing records in other online library catalogs both nationally and internationally. The structure of RDA is focused on helping catalog users find and identify, select and obtain the information they desire by gathering bibliographic records together through relationships between works and their creators.

RDA is being continually updated and adapting to new materials and new ways of accessing those materials.

What the manual will cover!

This manual is for helping catalogers navigate RDA, it gives the concepts, vocabulary and various elements necessary for RDA cataloging. The manual also includes RDA examples and Sage specific practices.

What the manual will not cover!

This manual will not cover how to catalog items using Marc, though examples are given with specific Marc tags to help catalogers. RDA is the standard we reference when creating a bibliographic description and MARC is the standard we use when coding that bibliographic description for computer use. Subject headings will also not be covered in this manual, for further questions it is always appropriate to contact a cataloging mentor!

Difference between AACR2 and RDA

There are similarities for bibliographic records created with AACR2 rules and with RDA instructions, because the RDA instructions are based on the old AACR2 rules, in that they follow established cataloging patterns and practices. The new RDA standard offers many options and alternatives that allow catalogers to use their own judgment in rule interpretation, more so than in AACR2. RDA is different from AACR2 in several ways. It provides a theoretical framework that is based on data models instead of the piece in hand approach AACR2 uses. RDA standard also builds cataloger's judgment based on principles; focuses on content, not on display; is independent of any particular syntax or structure encoding schema (such as MARC, etc.); provides a set of guidelines rather than rules; and provides mandatory and optional elements based on FRBR (Functional Requirements for Bibliographic Records). Additionally, the organization of RDA is very different from AACR2. Instead of separate chapters for classes of materials, such as books, cartographic materials, printed music, etc., RDA is principle-based and organized around the goals or tasks to help users "identify" and "relate" the resources they need from our collections. There are general instructions applying to all resources with specific instructions for characteristics unique to certain categories of resources.

RDA is a standard for resource description and access designed for the digital world...RDA goes beyond earlier cataloging codes in that it provides guidelines on cataloging digital resources and places a stronger emphasis on helping users find, identify, select, and obtain the information they want. RDA also supports the clustering of bibliographic records in order to show relationships between works and their creators.

- **RDA centers cataloging around general objectives & principles instead of specific rules**
- **RDA focuses on content instead of display (e.g. ISBD) or coding (e.g. MARC)**
- **RDA uses entity-relationship model, whereas AACR2 was principle-based rules**
- **RDA helps patrons find, identify, select, and obtain items [aligned with FRBR user tasks]**

***Find** – Search criteria and catalog use*

***Identify** – Confirm that patron has found the right items*

***Select** – Item that matches content, format, etc.*

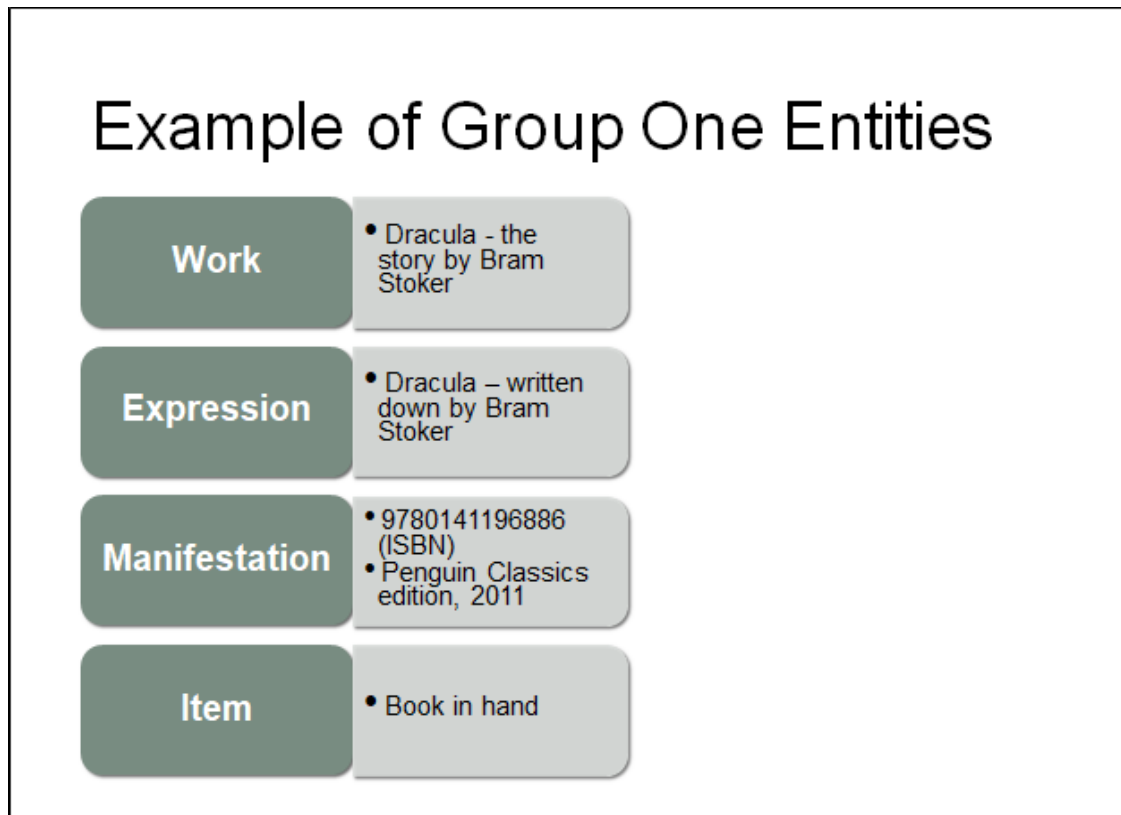

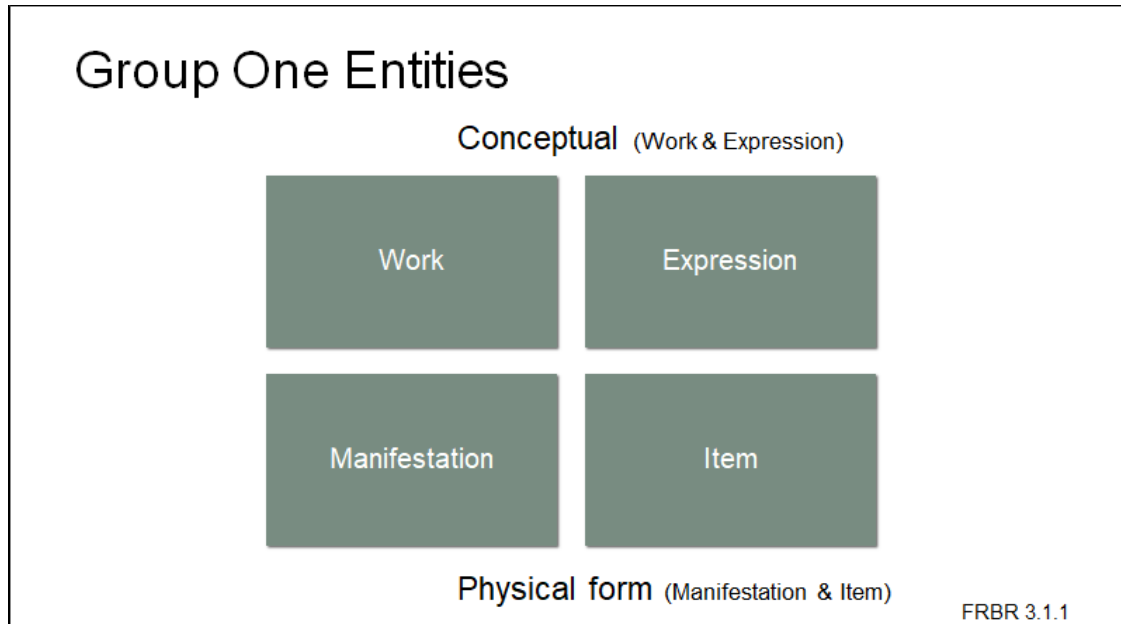

***Obtain** – Assist the patron in getting a specific item (place holds, locate on shelf)*

FRBR - Functional Requirements for Bibliographic Records

Functional Requirements for Bibliographic Records is a conceptual model (an abstract depiction) of the bibliographic universe to describe entities, relationships, and attributes (i.e., metadata). It is separate from any cataloging or display standards, although currently [ISBD](#) punctuation is used in many RDA bibliographic records. FRBR breaks the bibliographic universe into entities and relationships.

Entities

Group 1: work, expression, manifestation, item (things in the library's collection)

Group 2: people, families, corporate bodies related to Group 1 (author, director)

Group Two -- Examples

Group Two Entities

Group 3: concept, object, event, place (subjects)

Group Three Entities

FRBR 3.1.2

Group Three -- Entities -- Examples

Concept	<ul style="list-style-type: none">• Economics• Romanticism• Hydroponics
Object	<ul style="list-style-type: none">• Buckingham Palace• Apollo 11• The Eiffel Tower
Event	<ul style="list-style-type: none">• The Garment Workers' Strike• The Age of Enlightenment• The Nineteenth Century
Place	<ul style="list-style-type: none">• Howard Beach• The Alacran Reef• Morey Peak Wilderness Study Area

Relationships

We want information in the record to establish relationships between the entities in these groups. This information also establishes relationships between items, linking separate records by author, subject, etc.

Work: abstract idea created by person or corporate body (Rowling imagines Harry Potter)

“A distinct intellectual or artistic creation, that is, the intellectual or artistic content.”

Expression: a realization of that idea, but it has no physical characteristics (story is written)

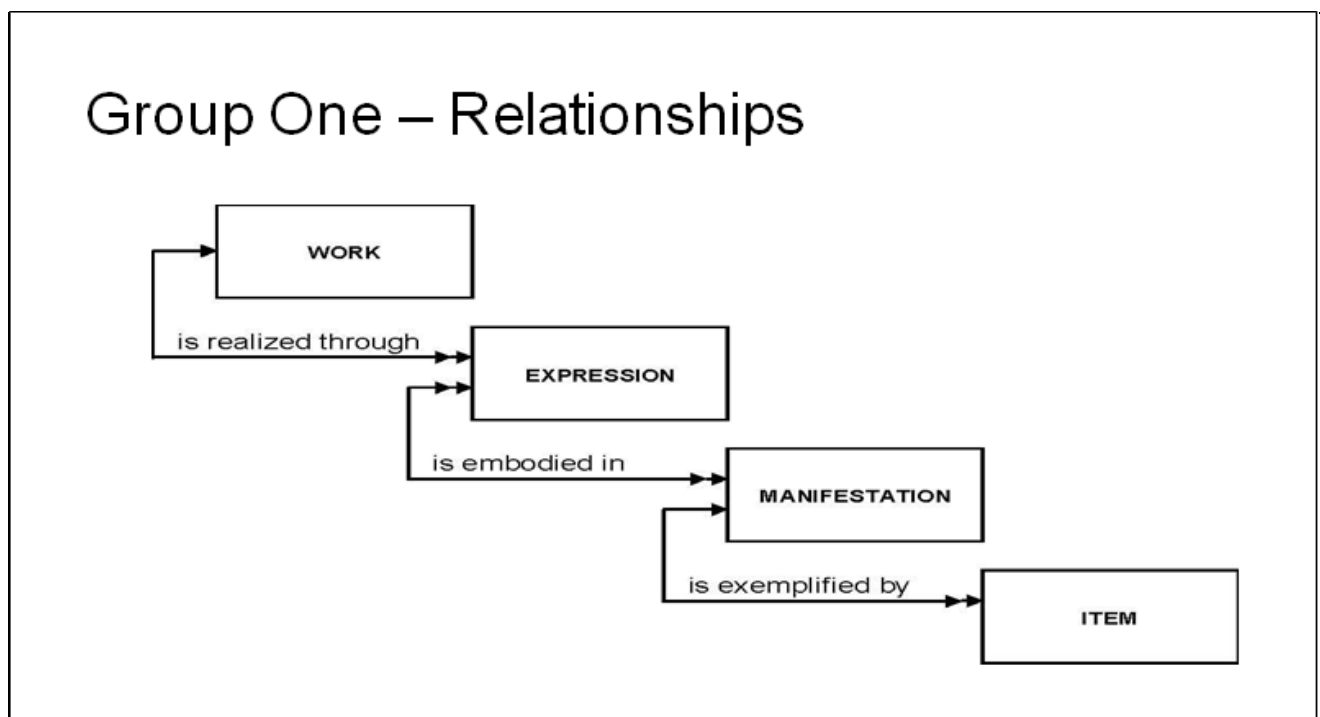

“An intellectual or artistic realization of a work in the form of alpha-numeric, musical or choreographic notation, sound, image, object, movement, et., or any combination of such forms.”

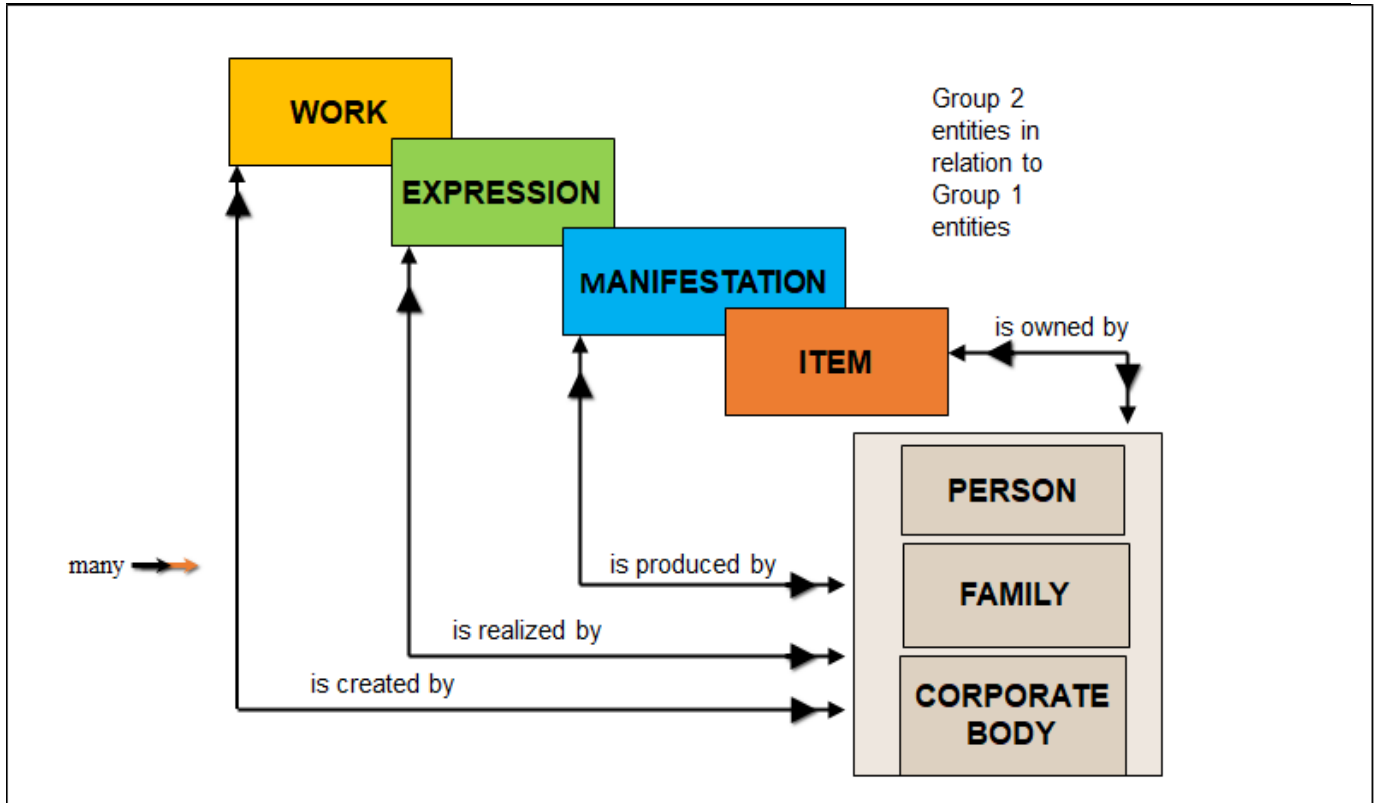

Manifestation: physical embodiment of an expression (book is published)

“A physical embodiment of an expression of a work.”

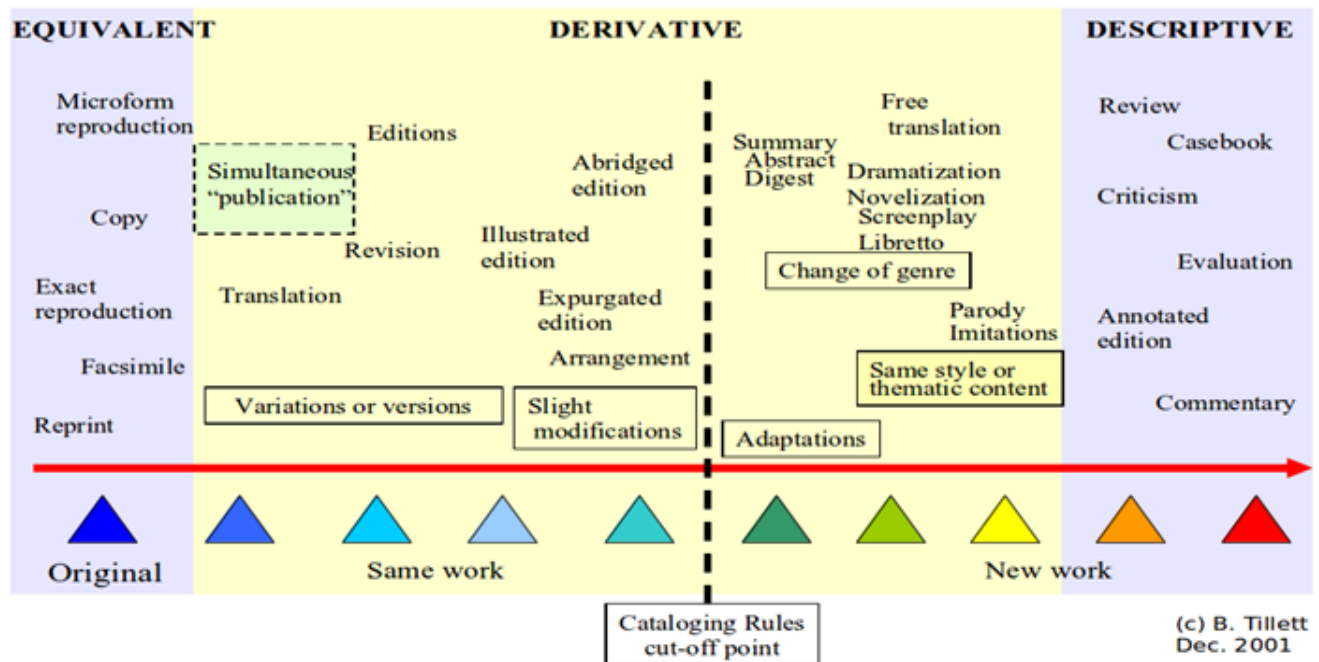

Item: physical copy of the manifestation, “the only concrete entity in FRBR” (a copy in a library)

“A singular exemplar or instance of a manifestation.”

Family of Works

Specific Element Changes from AACR2 to RDA

Fixed field Desc: i (designates ISBD punctuation)

Example

Outdated AACR2: *a*

Correct RDA: *i*

Fixed field DtSt: separate dates for publication and copyright dates. Use “s” if only given a publication date. Use “t” if both publication and copyright dates are given on the resource, even if they are the identical

Example

Outdated AACR2: DtSt s
 Date1 2001
 =*260* \1\$aNew York : \$bHarperCollins, \$c[2001], *c2001*.

Correct RDA: DtSt t
 Date1 2022
 Date2 2022
 =264 \1\$aNew York : \$bFeiwei & Friends, \$c2022.
 =*264* \4\$c©2022

040 includes subfields \$b and \$e

Example

Outdated AACR2: =*040* \1\$aDLC \$beng \$dDLC

Correct RDA: =*040* \1\$aDLC \$beng *\$erda* \$dDLC

100 Includes \$e relator term. This is an authorized access point.

Example

Outdated AACR2: =*100* 1\ \$aCisneros, Sandra.

Correct RDA: =*100* 1\ \$aCisneros, Sandra, *\$eauthor*.

245 \$c Transcribe exactly as found on resource; include all names (Rule of Three is obsolete) or list first name followed by [and ten others]

Example

Outdated AACR2: =245 00 \$aSerendipity : \$bten romantic tropes transformed / \$cedited by Marissa Meyer ; with stories by Elise Bryant ... [et al.]

Correct RDA: =245 00 \$aSerendipity : \$bten romantic tropes transformed / \$cedited by Marissa Meyer ; with stories by Elise Bryant [and nine others].

245 \$h Do not use subfield h in RDA records (also known as GMD). This information has been replaced by 3xx fields.

Example

Outdated AACR2: =245 10 \$aWinding stair \$h[text (large print)] /\$cDouglas C. Jones.

Correct RDA:
=336 \\\$atext \$btxt \$2rdacontent
=337 \\\$aunmediated \$bn \$2rdamedia
=338 \\\$avolume \$bnc \$2rdacarrier

250 Transcribe edition exactly as found on resource

Example

Outdated AACR2: =250 \\\$a3rd ed.

Correct RDA: =250 \\\$aThird edition.

264 \$a Place of publication statement is transcribed as it is found on resource, or if not stated use [Place of publication not identified]

Example

Outdated AACR2: =260 \\\$a[S.I.] : \$bDodd, \$c1947, c1942.

Correct RDA: =264\1\$a[Place of publication not identified] : \$bOrca Book Publishers, \$c2022.

264 \$b Transcribe as found on resource, or if not stated use [publisher not identified]. The title page is the preferred source. Use first publisher, don't abbreviate unless that is how it is stated on resource. If listed with "imprint of ..." or similar, include that information.

Example

Outdated AACR2: =260 \\\$aLondon :\$b[s.n.] ;\$c1971.

Correct RDA:
=264\1\$aNew York : \$bHarper Teen, an imprint of HarperCollinsPublishers, \$c[2022]
=264\1\$aBoston : \$b[publisher not identified], \$c2010.

264 \$c Replace incomplete or unknown dates with brackets and estimated date or date range

Example

Correct RDA: =264 \1\$aNew York : \$bEmber \$c[2022]

264 If copyright is stated, enter a second 264, second indicator 4, and use the copyright symbol

Example

Outdated AACR2: =260 \1\$aNew York : \$bEmber \$cc1985

Correct RDA: =264 \1\$aNew York: \$bEmber, \$c[1985]

=264 \4\$a©1985

300 Do not use abbreviations, measurements are in centimeters (cm is considered a symbol with RDA, rather than an abbreviation)

Example

Outdated AACR2: =300 \1\$a45 p. :\$bcol. ill., col. maps ;\$c18 cm.

Correct RDA: =300 \1\$a 302 pages : \$billustrations ; \$c25 cm

490 Record series numbering as it appears on item

Example

Outdated AACR2: =440 \0\$aThis is America ;\$vno. 1 [became obsolete in 2008]

Correct RDA: =490 \1\$aSo many books ; \$vXII

700 List additional creators in separate 700 tags, include \$e relator (authorized access point)

Example

Outdated AACR2: = 100 1\ \$aStewart, Sarah.

= 245 14 \$The library /\$cSarah Stewart ; pictures by David Small.

= 700 1\ \$aSmall, David.

Correct RDA: =100 1\ \$aKaufman, Amie, \$eauthor.

=245 10\$aAurora rising / \$cAmie Kaufman & Jay Kristoff.

=700 1\ \$aKristoff, Jay, \$eauthor.

Additional changes

- Transcribe information as it is found on the item, particularly for 245, 250, 490, and 264.
- Guidelines on basic transcription from RDA Toolkit: “Preserve the capitalization, punctuation, numerals, abbreviations, and diacritics as they appear on the manifestation.”
- Do not abbreviate words unless they are abbreviated on the item itself.
- If a resource does not specify information, the cataloger can include assumed information in brackets. A full set of brackets is used for every field.

Incorrect: 490 1\ \$a [Hunger games ; \$v book 1]

Correct: 490 1\ \$a [Hunger games] ; \$v [book 1]

- Do not correct errors. Use a 500 field note to state a correction if you feel it is necessary.

Vocabulary Changes

(For further RDA vocabulary see [Glossary](#)) [RDA vocabulary comes from FRBR & FRAD]

Authorized access points used to be called headings

Preferred title used to be call main entry and/or uniform title

Preferred source used to be called chief source

Creator used to be called author, composer, illustrator, etc.

Elements used to be called areas

Variant access points used to be called see references

Carrier description used to be called physical description

FRBR = Functional Requirements for Bibliographic Records

FRAD = Functional Requirements for Authority Data

FRSAD = Functional Requirements Subject Authority Data

Relator terms are added terms such as author, publisher, artist, director, etc. to give more information about the people listed in the records

Latin abbreviations are no longer applicable under RDA. Below are examples of Latin terms that can be found in AACR2 era records and there are examples in the previous Specific Elements section.

et al. – Latin: *et alii* (masculine), *et aliae* (feminine), or *et alia* (neuter) > meaning: and others (AACR2 rules: use if a single statement of responsibility names more than three persons...performing the same function, or with same degree of responsibility [also came to be known as the “Rule of 3”])

s.l. – Latin: *sine loco* (AACR2 rules: use if no place or probable place can be given)

s.n. - Latin: *sine nomine* (AACR2 rules: use if name of publisher, distributor, etc., is unknown)

sic - Latin: > meaning so, thus (AACR2 rules: used to explain a typographical error on title page)

i.e. - Latin: *id est* > meaning that is (AACR2 rules: used to supply intended "correct" text of a transcribed error)

Description Elements

INTRODUCTION

RDA relies on the principle of accurate representation of the information in a resource. Not only does RDA specify *what* information is to be captured for description, but it also specifies *how*. For many manifestation level elements, (e.g. title proper, edition statement, etc.) information is *transcribed* from the resource. In practical terms, this means to capture the data without making any adjustments beyond those specified in other parts of RDA or local practice (e.g. capitalization). This even includes typographical errors or misspellings. Other elements (often higher level work or expression level elements) are to be simply *recorded* from the resource. This means that the captured information may not be as it appears on the resource, but the *content* remains the same. For a list of which elements are transcribed vs. recorded, see [Appendix C](#). Some elements are neither transcribed or recorded, and are *coded* instead.

RDA has identified a list of elements that are considered most beneficial in helping to fulfill the FRBR user tasks of *find*, *identify*, *select*, and *obtain*. In this section, these elements are designated as CORE and CORE IF elements, and they are also listed in [Appendix D](#). They are not intended to be a set of “minimum requirements” as under AACR2, but rather are required if they are 1) applicable to the resource being described, and 2) readily ascertainable. Elements designated as CORE-IF, are to be considered CORE only in certain circumstances. For example, if the place of publication CORE element is unavailable, then the place of distribution CORE IF element then becomes CORE.

Starred (*) elements indicate that there are guidelines for local SAGE practice regarding this element. Please see the section entitled “Sage Specific Practices”.

The following description elements are generally presented in the order they would be found in a MARC record, not as they would be listed in RDA documentation. However, each element’s corresponding RDA number is listed for further reference.

MODE OF ISSUANCE (RDA 2.13)

Mode of issuance is a categorization reflecting whether a resource is issued in one or more parts, the way it is updated, and its intended termination.

Use evidence presented by the resource itself (or on any accompanying material or container) as the basis for determining the mode of issuance of the resource. If desired, take additional evidence from any source.

RDA 2.13.1.3 directs you to use one or more of the terms listed below:

1. **Single unit** (*m*) - (e.g., a single volume monograph and a PDF file, where the resource is issued as a single physical unit)
2. **Multipart monograph** (*m*) - (e.g., encyclopedias, dictionaries, and multi-volume sets where the resource, issued in two or more parts, is complete or is intended to be completed within a finite number of parts)
3. **Serial** (*s*) - (e.g., periodicals, monographic series, and newspapers where the resource is issued in successive parts, usually bearing numbering, and having no predetermined conclusion)
4. **Integrating resource** (*i*) - (e.g., loose-leaf, manuals, and websites where adding and changing the content is dynamic but the updates and changes remain integrated into the whole)

This data is **coded** in the **BLvl** fixed field, which is in **07** in the **MARC Leader**

IDENTIFIER (RDA 2.15 - CORE)

Identifiers are character strings associated with a resource that serves to differentiate it. They may adhere to internationally recognized schemes (e.g., ISBN, ISSN, URN), as well as be assigned by publishers, distributors, government publications agencies, document clearinghouses, archives, etc., following internally devised schemes, such as music publishers' numbers and plate numbers. A URL does **not** qualify as a manifestation identifier.

If the identifier is one for which there is a prescribed display format (e.g., ISBN, ISSN, URN), record it in accordance with that format. If an identifier is known to be incorrectly represented in the resource, record the number **as it appears** and indicate that the number is incorrect, canceled, or invalid, as appropriate.

Internationally recognized identifiers are preferred, if applicable. Additional identifiers are optional. Do not give an ISBN for an issue or part of a serial.

Take identifiers **from any source**.

LCCN (Library of Congress Control Number)

A LCCN is a unique number assigned to a record by the Library of Congress. Before January 2001, LCCNs consisted of a three-character prefix (often containing blanks), a two-digit year, a six-digit serial number, and a trailing blank. This number was often displayed with a hyphen separating the year and the serial number. After December 2000, LCCNs consist of a two-character prefix (often containing blanks), a four-digit year, and a six-digit serial number. Do not record any blanks.

This data is **recorded** in **MARC 010 \$a** (**\$z** if canceled or invalid)

MARC Example

010 \\\$a2021287083

ISBN (International Standard Book Number)

An ISBN is a unique number assigned to an item by its publisher. Each ISBN is a 10- or 13-digit number and has four parts:

1. the language group of the country of publication
2. the publisher
3. the title
4. the check character

Thirteen-digit ISBNs must begin with either 978 or 979 (a 13-digit EAN beginning with 978 or 979 may be input as a valid ISBN). If printed in a book, catalog, or bibliography, these four parts are usually separated by hyphens, periods, or spaces. Do not enter the hyphens, periods, or spaces.

This data is **recorded** in **MARC 020 \$a** (**\$z** if canceled or invalid)

MARC Examples

020 \a9789070002343

020 \a0435916610\$q(paperback)

020 \a0387082662\$q(U.S.)

020 \z0870684302

ISSN (International Standard Serial Number)

An ISSN is the identifier assigned to a serial by an ISSN registration agency. If the ISSN of a serial appears within the resource, include it in the record. If the resource has both a numeric and/or alphabetic designation and a chronological designation, record both. Do not treat a date of production, publication, distribution, or manufacture as a chronological designation.

This data is **recorded** in **MARC 022 \$a** (\$y if incorrect) (\$z if canceled)

MARC Examples

022 \a0046-225X

022 0\a0046-225X\$y0046-2254

022 0\a0145-0808\$z0361-7106

Other Standard Identifier (e.g., UPC)

These identifiers are standard numbers or codes published on an item that may include an International Standard Code (ISRC), Universal Product Code (UPC), International Standard Music Number (ISMN), International Article Number (EAN), or Serial Item and Contribution Identifier (SICI).

This data is **recorded** in **MARC 024 \$a** (\$z if canceled or invalid)

MARC Examples

024 1\a078221882927

024 2\aM011234564

Publisher or Distributor Number

These identifiers are formatted numbers used for sound recordings, printed music, other music-related materials, and video recordings. For the publisher number for music, the number may be:

1. the issue number assigned to a recording, one side of a recording, or a packaged group of recordings
2. the matrix number, usually inscribed on the disc
3. the plate number or other publisher number assigned to a specific music score

This data is **recorded** in **MARC 028 \$a**

MARC Examples

028 00\$a**GV-201A**\$bGood Vibrations Records

028 11\$a**L27410X**\$bChaparral

028 40\$a**VA5386**\$bVestron Video

028 02\$a**PJC 222013**\$bParis Jazz Corner Productions

028 62\$a**HM 76**\$bHarmonia Mundi

LANGUAGE OF CONTENT (RDA 7.12)*

Record details of the language or languages used to express the content of the resource if they are considered to be important for identification or selection. This is often the case when:

1. the item contains more than one language one of which may be sign language
2. the item is or includes a translation
3. the language of the abstracts, accompanying material, table of contents, or summaries differs from the language of the main item

For moving image resources, record the language code of spoken or sung language associated with the item, as well as sign language and any language code of the languages of accompanying sound. Languages used to provide access to a resource in an accessible alternative mode are also recorded, as well as subtitles, intertitles, and captions, as appropriate.

This data is **coded** in **MARC 041 \$a - \$t** (MARC Code List for Languages)

This data is used *in conjunction with* the **Lang** fixed field, which is in **35-37** of **MARC 008**

This data is used *in addition to* data in **MARC 546 \$a**

MARC Examples

008/35-37 eng

041 1\$aeng\$hfre

546 \aTranslated from the French.

(Text is in English, translated from French)

008/35-37 mul

041 0\$aeng\$aspa

546 \aText in English and Spanish.

(Bilingual book in English and Spanish)

008/35-37 eng

041 1\\${deng}\$hfre\$hger\$hita

546 \\${a}Sung in English, translated from the French, German, and Italian.

(Sound recording of works sung in English, originally in French, German, and Italian)

008/35-37 eng

041 1\\${aeng}\$bger\$jger

546 \\${a}English soundtrack, summary and subtitles In German.

(An English language soundtrack contains a German language summary on its package and German subtitles)

008/35-37 eng

041 0\\${aeng}\$peng

546 \\${a}English soundtrack with closed-captioning for the hearing impaired.

(A videorecording in English with English closed captioning for the hearing impaired)

TITLE (RDA 2.3)

Transcribe a title **as it appears** on the source of information. Apply the general guidelines on transcription given under **RDA 1.7**.

Title Proper (RDA 2.3.2 – CORE)*

Title proper is the chief name of a resource. It is the focus for identifying the preferred source of information. An alternative title is treated as part of the title proper. The title proper excludes any parallel titles proper or other title information.

Punctuation marks included in the title proper to convey added meaning should **not** necessarily be used to differentiate between the title proper, parallel titles proper, and other title information.

When a title proper is grammatically presented with a creator and a possessive apostrophe, retain the information as presented.

If the title proper is taken from a source other than the title page, title frame, or title screen, include a source of description note indicating the source. If the information does not appear on a source forming part of the resource itself, take it from one of the following sources (in order of preference):

1. accompanying material (e.g., a leaflet, an “about” file)
2. a container that is not issued as part of the resource itself (e.g., a box, case made by the owner)
3. other published descriptions of the resource
4. any other available source (e.g., a reference source)

Do not correct errors for monographs, or record “[sic]” or “[i.e., ...]”; instead, give a note to explain.

Do correct errors for serials and integrating resources.

This data is *transcribed* in **MARC 245 \$a \$n \$p**

MARC Examples

245 00\$a**Concerto for piano with chamber ensemble, op. 26 (1961)** /\$cRichard Swift.

245 10\$a**...and then there were none...** :\$ba long-buried chapter in Apache history /\$c[by Jess G. Hayes].

245 10\$a**Brave new world** ;\$band, Brave new world revisited /\$cAldous Huxley ; foreword by Christopher Hitchens.

245 10\$a**Teusday's tasks.**

246 3/\$iCorrected title: \$aTuesday's tasks.

(Title error on monograph)

245 \$a**Zoology studies.**

246 \$iMisspelled title on number 1: \$aZoology studies.

(Title error on serial)

Parallel Title Proper (RDA 2.3.3)

A parallel title proper is the title proper in another language and/or script. An alternative title in another language and/or script is treated as part of the parallel title proper. An original title in a language different from that of the title proper that is presented as the equivalent of the title proper is treated as a parallel title proper.

The source for parallel title proper has been expanded to include **any source within the resource**.

This data is *transcribed* in **MARC 245 \$b**

MARC Examples

Other Title Information (RDA 2.3.4)

Other title information is information that appears in conjunction with, and is subordinate to, the title proper of a resource. It may include subtitles, but does not include variations on the title proper such as spine titles, sleeve titles, etc. or designations and/or names of parts, sections, or supplements. Other title information may be supplied for cartographic resources and moving image resources.

In general, the cataloger does **not** create other title information; however, other title information can be created for: cartographic resources (**RDA 2.3.4.5**), and moving image resources (**RDA 2.3.4.6**).

The source for other title information is the same source of information as the title proper applying the basic instructions on titles given under **RDA 2.3.1**.

This data is *transcribed* in **MARC 245 \$b**

Variant Title (RDA 2.3.6)*

Record a variant title that is considered important for identification or access by applying the basic instructions on titles at **RDA 2.3.1**

Variant forms of a title are associated with the resource, whether they are or are not on the resource being described. These variant titles can be found on the jacket, spine, title screen, cover, caption title, running title, container, or in accompanying materials. These may include the following:

1. part of a title (e.g., an alternative title or a section title recorded as part of a title proper)
2. alternative representations of a title proper, parallel title proper, or other title information (e.g., abbreviations, symbols, initialisms/acronyms, Arabic/Roman numerals, contractions, symbols, etc.)
3. corrections to titles that appear in the manifestation in an incorrect form
4. titles from authorized sources outside of the manifestation being described

This data is **recorded** in **MARC 246 \$a**

STATEMENT OF RESPONSIBILITY (RDA 2.4 - CORE)

A statement of responsibility is a statement relating to the identification and/or function of any persons, families, or corporate bodies responsible for the creation of, or contributing to the realization of, the intellectual or artistic content of a resource. If there is more than one statement of responsibility relating to the title proper, only the first is required. Other statements of responsibility are optional.

Transcribe a statement of responsibility **in the form in which it appears** on the source of information (including prepositions if present). Apply the general guidelines on transcription given under **RDA 1.7**.

Take statements of responsibility relating to title proper from the following sources (in order of preference):

1. the same source as the title proper
2. another source within the resource itself
3. one of the other sources of information specified under **RDA 2.2.4**

Square brackets are needed only when data is taken from outside of the resource, or when a cataloger supplies information for clarity.

The AACR2 “Rule of Three” is not part of RDA. **RDA 2.4.1.5** directs you to record the persons, families, or corporate bodies named in the resource. It is only an option to omit all but the first of each group and indicate the omission by summarizing (in English) what has been omitted (do not record “[et al.]”, but rather “[and others]” or “[and 3 others]” if there are 4 total in the group).

RDA 2.4.2 states “If more than one statement of responsibility relating to title proper appears on the source of information, only the first recorded is required.”

This data is ***transcribed*** in **MARC 245 \$c**

MARC Examples

245 00\$aLatino immigrant's guide to starting a business in Arkansas :\$ba handbook for entrepreneurs /\$c**Christina Abreo [and 4 others]**.

EDITION STATEMENT (RDA 2.5 - CORE)

An edition statement is a statement identifying the edition to which a resource belongs. An edition statement may also include a designation of a named revision of an edition. An edition statement may also include a statement (or statements) of responsibility relating to the edition and/or to a named revision of an edition.

Transcribe an edition statement **as it appears** on the source of information. Apply the general guidelines on transcription given under **RDA 1.7**.

Note that in some languages the same term or terms can be used to indicate both edition and printing. A statement detailing the numbers of copies printed is **not** a designation of edition.

In case of doubt about whether a statement is a designation of edition, consider the presence of these words or statements as evidence that it is a designation of edition:

An edition statement can often be identified by the use of words such as **edition, issue, level, state, update,** and **version,** or their equivalents in other languages. Numbers and/or statements of responsibility may also appear with an edition statement. Under RDA, the edition statement is a transcribed element and no abbreviations are used unless they appear in the source used for the edition statement.

If there is more than one designation of edition, record the statements in the order indicated by the sequence, layout, or typography of the statements on the source of information.

If a designation of edition consists of a letter or letters and/or a number or numbers (expressed either as numerals or as words) without accompanying words, add an appropriate word. Indicate that the information was taken from a source outside the manifestation itself (see **RDA 2.2.4**)

This data is **transcribed** in **MARC 250 \$a**

250 \aUnabridged.

250 \a[Revised].

250 \aVersion 1.1.

250 \aCanadian edition =\$bEdition canadienne.

PRODUCTION, PUBLICATION, DISTRIBUTION, AND MANUFACTURE

Production Statement (RDA 2.7)

A production statement is a statement identifying the place or places of production, producer or producers, and date or dates of production of a resource in an **unpublished** form. Production statements include statements relating to the inscription, fabrication, construction, etc., of a resource in an unpublished form. Note that RDA considers resources issued via the Internet (e.g. blogs) to be published material.

Production statements are commonly found in records representing unpublished material such as archival collections and personal papers. Because the vast majority of material represented in the Sage catalog is (or is considered) published, this element is only to be used in rare circumstances.

This data is **transcribed** in **MARC 264 \0 \$a \$b** and **recorded** in **MARC 264 \0 \$c**

MARC Example:

264 \0\$a[Denver, Colorado?] :\$b[producer not identified],\$c[1940?]

Publication Statement (RDA 2.8 - CORE)

A publication statement is a statement identifying the place or places of publication, name of publisher or publishers, and date or dates of publication of a resource.

Take publication information from the following sources (in order of preference):

1. the same source as the publisher's name
2. another source within the resource itself
3. one of the other sources of information specified under **RDA 2.2.4**

Place of Publication

A place of publication is a place associated with the publication, release, or issuing of a resource; if more than one place of publication appears on the source of information, only the first recorded is required. Transcribe places of publication **in the form in which they appear** on the source of information (including abbreviations). Include both the local place name (city, town, etc.) and the name of the larger jurisdiction (state, province, and/or country) if present on the source of information.

When there is more than one place of publication on the source of information, record all in the order indicated by the sequence, layout, or typography of the names on the source of information (**RDA 2.8.2.4**). However, only the first place of publication is a required core element under RDA.

If the place is **not identified** in the resource, supply the place of publication or probable place of publication in brackets using outside sources (if possible). Otherwise, record “[Place of publication not identified].” Do not record [S.I.], or use abbreviations as under AACR2. If the place is probable but not confirmed, supply a question mark.

This data is **transcribed** in **MARC 264 \1 \$a**

This data is used *in addition to* data in the **Ctry** fixed field, which is in **15-17** of **MARC 008**

MARC Examples

008/15-17 xx

264 \1\$a[Place of publication not identified] :\$b[publisher not identified],\$c2009.

Publisher's Name

A publisher's name is the name of a person, family, or corporate body responsible for publishing, releasing, or issuing a resource. For early printed resources, printers and booksellers are treated as publishers. If more than one publisher's name appears on the source of information, only the first recorded is a required core element.

Record the publisher's name applying the basic instructions on recording publication statements given under **RDA 2.8.1** -- "**in the form in which they appear** on the source of information."

If **more than one entity** is named as a publisher of the resource, record the entities in the order indicated by the sequence, layout, or typography of the names on the source of information. Larger entities that are associated with the name of the publisher (i.e. imprints, divisions, etc.) may be included but are not required.

For a resource in a published form, if **no publisher is named** within the resource, and cannot be identified from other sources, record "[publisher not identified]". Do not record [s.n.] as under AACR2.

This data is *transcribed* in **MARC 264 \1 \$b**

MARC Examples

264 \1\$aWarrendale, PA, U.S.A. :\$b**SAE International**, \$c[1994]

264 \1\$aNew York, New York :\$b**Dell Publishing Co., Inc.**, \$c[1972]

264 \1\$aNew York :\$b**Basic Books, a member of the Perseus Books Group**, \$c[2014]

264 \1\$a[Place of publication not identified] :\$b**[publisher not identified]**, \$c2009.

Date of Publication

A date of publication is a date associated with the publication, release, or issuing of a resource.

If the date of publication is **not identified** in a **single-part resource** (e.g. monograph), supply the date or approximate date of publication, using the guidelines below, rather than give "[date of publication not identified]."

1. If an item lacking a publication date contains **only a copyright date**, apply the following in the order listed:

- a) Supply a date of publication that corresponds to the latest copyright date, in square brackets, if it seems reasonable to assume that date is a likely publication date.
 - b) If an item lacking a publication date contains a copyright date and a date of manufacture and the year is the same for both, supply a date of publication that corresponds to that date, in square brackets, if it seems reasonable to assume that date is a likely publication date.
 - c) If an item lacking a publication date contains a copyright date and a date of manufacture and the years differ, supply a date of publication that corresponds to the latest copyright date, in square brackets, if it seems reasonable to assume that date is a likely publication date.
2. If an item contains **only a date of distribution**, apply the following in the order listed:
 - a) Supply a date of publication that corresponds to the distribution date, in square brackets, if it seems reasonable to assume that date is a likely publication date. Also record a date of distribution as part of a distribution statement if determined useful by the cataloger.
 - b) If it does not seem reasonable to assume that the distribution date is a likely publication date, supply a date of publication, in square brackets, based on the information provided. Also record the distribution date as part of a distribution statement if determined useful by the cataloger.
 3. If an item lacking a publication date contains **only a date of manufacture**, apply the following in the order listed:
 - a) Supply a date of publication that corresponds to the manufacture date, in square brackets, if it seems reasonable to assume that date is a likely publication date. For books, this means that the item is assumed to be the first printing of the edition. Also record the manufacture date as part of a manufacture statement if determined useful by the cataloger.
 - b) If the date of manufacture given implies that it is likely not the same as the date of publication, supply a date of publication, in square brackets, using the information provided. Also record the date of manufacture as part of a manufacture statement if determined useful by the cataloger.

If the date of publication is **not identified** in a **multi-part monograph, serial, or integrating resource**, supply the date or approximate date of publication, using the guidelines below, rather than give “[date of publication not identified].”

1. If the first issue, part, or iteration of a multi-part monograph, serial, or integrating resource is available, record the date of publication of that issue, part, or iteration, followed by a hyphen (e.g. 1988-)
2. If publication of the resource has ceased or is complete and the first and last issues, parts, or iterations are available, record the dates of publication of those issues, parts, or iterations, separated by a hyphen (e.g. 1968-1973)
3. If publication of the resource has ceased or is complete and the last issue, part, or iteration is available, but not the first, record the publication date of the last issue, part, or iteration, preceded by a hyphen (e.g. -1977)
4. For an integrating resource, supply the date of the last update if it is considered to be important. If the date of publication is the same for all issues, parts, or iterations, record only that date as the single date (e.g. 1995-1998 [updated 1999])

5. If the first and/or last issue, part, or iteration is not available, supply an approximate date or dates. If the date or dates cannot be approximated, do not record a date of publication.

This data is **recorded** in **MARC 264 \1 \$c**

This data *may be used in conjunction with* the **Date1** or **Date2** fixed fields, which are in **07-10**, and **11-14** of **MARC 008** respectively.

MARC Examples

Distribution Statement (RDA 2.9 - CORE IF)

A distribution statement is a statement identifying the place or places of distribution, the distributor or distributors, and date or dates of distribution of a resource. These are core elements for a resource in a published form **ONLY** when publication information is not identified or available.

See applicable sections of "Publication Statement" for further information.

This data is **transcribed** in **MARC 264 \2 \$a \$b** and **recorded** in **MARC 264 \2 \$c**

MARC Examples

264 \2\$aKuala Lumpur :\$bPengedar, Metro Book Distributor.

264 \2\$aWaverly, IA :\$bDistributed by CQ Products,\$c[2010]

Manufacture Statement (RDA 2.10 - CORE IF)

A manufacture statement is a statement identifying the place or places of manufacture, name of manufacturer or manufacturers, and date or dates of manufacture of a published resource. These are core elements for a resource in a published form **ONLY** when neither publication **NOR** distribution information can be identified.

See applicable sections of "Publication Statement" for further information.

This data is **transcribed** in **MARC 264 \3 \$a \$b** and **recorded** in **MARC 264 \3 \$c**

264 \3\$aHong Kong :\$b[manufacturer not identified],\$c[1995]

COPYRIGHT DATE (RDA 2.11 - CORE IF)

Give a copyright date for a single-part monograph if neither the date of publication nor the date of distribution is identified, or if the date of publication or the date of distribution is *different* than the copyright date. You are not required to record copyright dates for multi-part monographs, serials, and integrating resources. If the resource has multiple copyright dates that apply to various aspects (e.g., text, sound, graphics), record only the latest copyright date. Take information on copyright dates from any source.

Record copyright dates, applying the general guidelines on numbers given under **RDA 1.8**. Precede the date by the copyright symbol © or the phonogram symbol ℗. Use “copyright” or “phonogram” only if the symbol cannot be reproduced. If a resource contains both copyright and phonogram dates and they differ, record both dates. Do not enclose copyright dates in square brackets.

This data is **recorded** in **MARC 264 4 \$c**

This data *may be used in conjunction with* the **Date1** or **Date2** fixed fields, which are in **07-10**, and **11-14** of **MARC 008** respectively.

EXTENT (RDA 3.4 - CORE)

Extent is the number and type of units and/or subunits that makes up the resource. A unit is a physical or logical constituent of a resource (e.g. a volume, audiocassette, film reel, map, or digital file). A subunit is a physical or logical subdivision of a unit (e.g., a page of a volume, a frame of a microfiche, a record in a digital file).

Extent is a core element only if the resource is complete or if the total extent is known. Record subunits only if readily ascertainable and considered important for identification or selection. Use evidence

presented by the resource itself (or on any accompanying material or container) as the basis for recording the extent of the resource. If desired, take additional evidence from any source.

Record the extent of the resource by giving the number of units and an appropriate term for the type of carrier as listed under **RDA 3.3.1.3** and **Appendix A** of this manual. Record the term in the singular or plural, as applicable. If the resource consists of more than one type of carrier, record the number of each applicable type. Note that in recording extent abbreviations are not to be used. Spell out works such as “pages” or “volume.”

For certain audio/visual materials, extent should include measurements of **duration** as described in **RDA 7.22**. This is one of the few situations where abbreviations should be used under RDA (i.e. “min.” for minutes and “sec.” for seconds (**RDA B.5.3**).

For a resource consisting of a **single volume**, record the extent in terms of pages, leaves, or columns, as appropriate to the resource, applying the following general guidelines:

1. If the volume is paginated (i.e., if there are page numbers on both sides of the leaves), record the number of pages.
2. If the volume is foliated (i.e., if there are leaf numbers on only one side of the leaves), record the number of leaves.
3. If the volume consists of pages with more than one column to a page and is numbered in columns, record the number of columns.
4. If the volume consists of sequences of leaves and pages, or pages and numbered columns, or leaves and numbered columns, record each sequence.
5. If the volume consists of pages, leaves, or columns that are not numbered, either count the pages, or estimate the number of pages (**RDA 3.4.5.3**).
6. If the page numbers are given in words and not in numbers, translate the words into numbers.
7. If the volume contains leaves or pages of plates that are not part of the resource, record the number of pages or leaves of plates at the end of the pagination number (**RDA 3.4.5.9**).

For a resource consisting of more than one part or volume, record the number of parts or volumes.

For a resource that is an updating loose-leaf, record “1 volume” followed by “loose-leaf” in parenthesis.

ILLUSTRATIVE CONTENT (RDA 7.15)

Record other illustrative content if considered important for identification or selection, and it may be taken from any source. The table below provides appropriate terms to be used. Any of the terms may be recorded in the singular or plural, as applicable.

<i>chart</i>	<i>coat of arms</i>	<i>facsimile</i>	<i>form</i>	<i>genealogical table</i>
<i>graph</i>	<i>illumination</i>	<i>illustration</i>	<i>map</i>	<i>music</i>
<i>photograph</i>	<i>plan</i>	<i>portrait</i>	<i>sample</i>	

These terms are sourced from the RDA Reference value vocabularies (under [RDA Illustrative Content](#))

Chart vs. graph: Use “chart(s)” for larger foldout or detachable items (e.g. periodic table poster). Use “graph(s)” for smaller printed items used alongside text within the publication.

Illustration vs. photograph: Use “photograph(s)” for images produced separately from the item itself (e.g. scrapbook). Use “illustration(s)” for images printed alongside other content within the item (e.g. plates).

Tables containing only words and/or numerical data are excluded.

Record details regarding the presence of color, tone, etc., in the illustrative content as appropriate.

This data is **recorded** in **MARC 300 \$b**

This data is used *in addition to* the **ILL** fixed field, which is in **18-21** (Books) of **MARC 008**

008/18-21 abc

300 \\\$ax, 577 pages :\$billustrations, color maps, portraits (some color) ;\$c19 cm

DIMENSIONS (RDA 3.5)*

Dimensions are the measurements of the carrier and/or the container of the resource. In most cases, dimensions include the measurements of height, width, depth, length, gauge, and the diameter of the carrier or container. For maps, still images, etc, the dimensions may reflect those of the face of the

map, etc., or of the pictorial area instead of (or in addition to) those of the carrier. This element is core for resources other than serials and online electronic resources.

Use evidence presented by the resource itself (or on any accompanying material or container) as the basis for recording the dimensions of the resource. If desired, take additional evidence from any source.

Unless instructed otherwise, record dimensions in centimeters to the next whole centimeter up, using the metric symbol cm (e.g., if the height measures 17.2 centimeters, record 18 cm). Please note that in RDA, metric symbols are **not** considered to be abbreviations, and should **not** precede a period. For discs and other audio carriers, inches may be used for dimensions (**RDA 3.5.1.4.4**), but as they are not a metric measurement, they should precede a period.

This data is **recorded** in **MARC 300 \$c**

300 \a1 audio disc (54 min.) ;c12 in. +e1 pamphlet (12 pages : color illustrations ; 24 cm)

500 \aAccompanied by 1 pamphlet (12 pages : color illustrations ; 24 cm).

FREQUENCY (RDA 2.14)

Frequency is the intervals at which the issues or parts of a serial or the updates to an integrating resource are issued. Take information on frequency from any source. Record the frequency of release of issues or parts of a serial or the frequency of updates to an integrating resource, if known, using an appropriate term listed below (**RDA 2.14.1.3**). If none of the terms listed is appropriate or sufficiently specific, make a note giving details of the frequency.

<i>daily</i>	<i>three times a week</i>	<i>biweekly</i>	<i>weekly</i>
<i>semiweekly</i>	<i>three times a month</i>	<i>bimonthly</i>	<i>monthly</i>
<i>semimonthly</i>	<i>quarterly</i>	<i>three times a year</i>	<i>semiannual</i>
<i>annual</i>	<i>biennial</i>	<i>triennial</i>	<i>irregular</i>

This data is **recorded** in **MARC 310 \$a**

This data is used *in addition to* the **Freq** and **Regl** fixed fields, which are in **18-19** (Continuing Resources) of **MARC 008**

MARC Examples

CONTENT, MEDIA, AND CARRIER TYPE

The General Material Designator (GMD) in AACR2 records, is not in RDA. GMDs were an inconsistent set of terms, which sometimes referred to content and sometimes to carrier. The vocabularies for these terms are “closed” lists in **RDA 6.9.1.3** (Content type), **RDA 3.2.1.3** (Media type), **RDA 3.3.1.3** (Carrier type).

Content Type (RDA 6.9 - CORE)

Content type is a categorization reflecting the fundamental form of communication in which the content is expressed and the human sense through which it is intended to be perceived. For content expressed in the form of an image or images, content type also reflects the number of spatial dimensions in which the content is intended to be perceived and the perceived presence or absence of movement. Take information on content type from any source.

Record the type of content contained in the resource using one or more of the terms listed in the table below. Record as many terms as applicable to the resource being described.

If the resource being described consists of more than one content type, instead of recording all, you may record: the content type that applies to the predominant part of the resource (if there is a predominant part), or the content types that apply to the most substantial parts of the resource (including the predominant part, if there is one).

<i>cartographic dataset</i>	<i>cartographic image</i>	<i>cartographic moving image</i>	<i>cartographic tactile image</i>	<i>cartographic tactile three-dimensional form</i>	<i>cartographic three-dimensional form</i>
<i>computer dataset</i>	<i>computer program</i>	<i>notated movement</i>	<i>notated music</i>	<i>performed music</i>	<i>performed movement</i>
<i>sounds</i>	<i>spoken word</i>	<i>still image</i>	<i>tactile image</i>	<i>tactile notated music</i>	<i>tactile notated movement</i>
<i>tactile text</i>	<i>tactile three-dimensional form</i>	<i>text</i>	<i>three-dimensional form</i>	<i>three-dimensional moving image</i>	<i>two-dimensional moving image</i>

These terms are sourced from the RDA Reference value vocabularies (under [RDA Content Type](#))

This data is **recorded** in **MARC 336 \$a**

This data is used *in addition to* the **Type** fixed field, which is in **06** in the **MARC Leader**

MARC Examples

336 \\\\$atext\$btxt\$2rdacontent

336 \\\\$astill image\$bsti\$2rdacontent

336 \\\\$aspoken word\$bspw\$2rdacontent

Media Type (RDA 3.2)

Media type is a categorization reflecting the general type of intermediation device required to view, play, run, etc., the content of a resource. Use evidence presented by the resource itself (or on any accompanying material or container) as the basis for recording media type. If desired, take additional evidence from any source.

Record the media type using one or more of the terms listed in the table below.

If the resource being described consists of more than one media type, instead of recording all, you may record: the media type that applies to the predominant part of the resource (if there is a predominant part) or the media types that apply to the most substantial parts of the resource (including the predominant part, if there is one).

<i>audio*</i>	<i>computer*</i>	<i>microform*</i>	<i>microscopic</i>	<i>projected*</i>
<i>stereographic</i>	<i>unmediated</i>	<i>video*</i>	<i>other</i>	<i>unspecified</i>

These terms are sourced from the RDA Reference value vocabularies (under [RDA Media Type](#))

This data is **recorded** in **MARC 337 \$a**

*Some media types require additional data in the **Category of Material** fixed field, which is in **MARC 007/00 (\$a)**

337 **\$avideo**\$bv\$2rdamedia

Carrier Type (RDA 3.3 - CORE)

Carrier type is a categorization reflecting the format of the storage medium and housing of a carrier in combination with the type of intermediation device required to view, play, run, etc., the content of a resource. Use evidence presented by the resource itself (or on any accompanying material or container) as the basis for recording carrier type. If desired, take additional evidence from any source.

Record the type of carrier used to convey the content of the resource using one or more of the terms listed in **RDA 3.3.1.3** and **Appendix A** of this manual. Record as many terms as applicable to the resource being described.

These terms are sourced from the RDA Reference value vocabularies (under [RDA Carrier Type](#))

If the resource being described consists of more than one carrier type, instead of recording all, you may record: the carrier type that applies to the predominant part of the resource (if there is a predominant part) or the carrier types that apply to the most substantial parts of the resource (including the predominant part, if there is one).

This data is **recorded** in **MARC 338 \$a**

Some carrier types require additional data in the **Specific Material Designation** fixed field, which is in **MARC 007/01 (\$b)**

FONT SIZE (RDA 3.13)

Font size refers to the size of the type used to represent the characters and symbols in a manifestation. For manifestations with text in a font size designed for persons with visual impairments, record a font size using one of the terms from the table below. Use evidence presented by the manifestation itself (or on any accompanying material or container) as the basis for recording a font size. Take additional evidence from any source.

<i>giant print</i>	<i>jumbo braille</i>	<i>large print</i>
--------------------	----------------------	--------------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Font Size](#))

This data is **recorded** in **MARC 340 \$n**

This data is used *in addition to* data in the **Form** fixed field, which is in **23** of **MARC 008**

MARC Example

008/23 d

340 **large print**\$2rdafs

SOUND CHARACTERISTICS (RDA 3.16)

Sound characteristics are “technical specifications relating to the encoding of sound in a manifestation” (RDA 3.16.1.1). Sound characteristics are generally recorded for manifestations consisting primarily of recorded sound; however, RDA provides an option to record sound characteristics in any situation.

Most common sound characteristics include the type of recording, recording medium, configuration of playback channels, and special playback characteristics. Information should be taken from the manifestation itself and any accompanying material or container. Additional information may come from any source.

Type of Recording (RDA 3.16.2)

The type of recording refers to the method used to encode audio content for playback. Examples of analog recordings include vinyl records and cassette tapes. Examples of digital recordings include CDs and DVDs.

<i>analog</i>	<i>digital</i>
---------------	----------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Type of Recording](#))

Recording Medium (RDA 3.16.3)

The recording medium refers to the type of device used to record sound on an audio carrier. Most analog recordings are magnetic. Most digital recordings are optical.

<i>magnetic</i>	<i>magneto-optical</i>	<i>optical</i>
-----------------	------------------------	----------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Recording Medium](#))

Configuration of Playback Channels (RDA 3.16.8)

Playback channels are the number of sound channels used to make a recording (e.g., one channel for mono, two for stereo, etc.). Note that “stereo” and “mono” are no longer considered abbreviations so there are no periods at the end of these words.

<i>mono</i>	<i>stereo</i>	<i>quadraphonic</i>	<i>surround</i>
-------------	---------------	---------------------	-----------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Configuration of Playback Channels](#))

Special Playback Characteristics (RDA 3.16.9)

Examples of special playback characteristics include equalization systems, noise reduction systems, etc. used in the recording of the audio track.

<i>CCIR encoded</i>	<i>CX encoded</i>	<i>dbx encoded</i>	<i>Dolby</i>	<i>Dolby-A encoded</i>
<i>Dolby-B encoded</i>	<i>Dolby-C encoded</i>	<i>LPCM</i>	<i>NAB standard</i>	<i>[other]*</i>

These terms are sourced from the RDA Reference value vocabularies (under [RDA Special Playback Characteristics](#))

**Because all of these terms are not indicative of material currently being published, RDA allows for current, accurate terminology to be used instead.*

This data is **recorded** in **MARC 344 \$a \$b \$g \$h**

This data is used *in conjunction with* data in **MARC 538 \$a**

This data *may be used in addition to* data in various fixed fields in **MARC 007**

MARC Examples

344 \\\$**digital**\$2rdatr

344 \\\$**optical**\$2rdarm

344 \\\$**stereo**\$2rdacpc

344 \\\$**Dolby-C encoded**\$2rdaspc

344 \\\$**Dolby digital 5.1**

ASPECT RATIO (RDA 7.19)

Aspect ratio refers to the numerical ratio of the width to the height of a moving image. Use evidence presented by the manifestation itself (or on any accompanying material or container) as the basis for recording an aspect ratio of a moving image. Take additional evidence from any source.

Record an aspect ratio **value** as a numerical ratio in standard format. The aspect ratio **designation** of the expression should be recorded using one or more of the terms below:

<i>full screen</i>	<i>wide screen</i>	<i>mixed aspect ratio</i>
--------------------	--------------------	---------------------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Aspect Ratio Designation](#))

This data is **recorded** in **MARC 345 \$c \$d**

This data is used *in conjunction with* data in **MARC 538 \$a**

MARC Examples

345 \\\$**c16:9**

345 \\\$**dwide screen**\$2rdaar

345 \\\$**c4:3**

345 \\\$**dfull screen**\$2rdaar

BROADCAST STANDARD (RDA 3.18.3)

Broadcast standard is a system used to format a manifestation of a video for television broadcast. Use evidence presented by the manifestation itself (or on any accompanying material or container) as the basis for recording a broadcast standard. Take additional evidence from any source.

Record a broadcast standard of the manifestation using an appropriate term from the following list:

<i>HDTV</i>	<i>NTSC</i>	<i>PAL</i>	<i>SECAM</i>
-------------	-------------	------------	--------------

These terms are sourced from the RDA Reference value vocabularies (under [RDA Broadcast Standard](#))

This data is **recorded** in **MARC 346 \$b**

This data is used *in conjunction with* data in **MARC 538 \$a**

MARC Examples

346 \\\$bHDTV\$2rdabs

346 \\\$bNTSC\$2rdabs

DIGITAL FILE CHARACTERISTICS (RDA 3.19)

Digital file characteristics are “technical specifications relating to the digital encoding of text, image, audio, video, and other types of data in a manifestation” (**RDA 3.19.1.1**) Most common digital file characteristics include file type, encoding format, and regional encoding.

Use evidence presented by the manifestation itself (or on any accompanying material or container) as the basis for recording digital file characteristics. Take additional evidence from any source.

File Type (RDA 3.19.2)

File type characterizes the general type of data content encoded in a computer file. Use terms from the list below:

<i>audio file</i>	<i>text file</i>	<i>program file</i>
<i>image file</i>	<i>data file</i>	<i>video file</i>

These terms are sourced from the RDA Reference value vocabularies (under [RDA File Type](#)).

Encoding Format (RDA 3.19.3)

Encoding format is the “schema, standard, etc., used to encode the digital content of a manifestation”. Because this characteristic does not require terms from a controlled list, supply an appropriate term.

Regional Encoding (RDA 3.19.6)

Regional encoding refers to the code identifying the region of the world for which a digital file has been encoded which may prevent the file from being played on a player from a different region. RDA provides prescribed terms for regional encoding; use those terms rather than terms found on the manifestation. Numbered regions refer to DVD encoding, whereas alphabetic regions refer to Blu-Ray and video game encoding.

<i>all regions</i>	<i>region 1</i>	<i>region 2</i>	<i>region 3</i>	<i>region 4</i>
<i>region 5</i>	<i>region 6</i>	<i>region 7</i>	<i>region 8</i>	<i>region A</i>
<i>region B</i>	<i>region C (Blu-ray)</i>	<i>region C (video game)</i>	<i>region J</i>	<i>region U/C</i>

These terms are sourced from the RDA Reference value vocabularies (under [RDA Regional Encoding](#)).

This data is **recorded** in **MARC 347 \$a \$b \$e**

This data is used *in conjunction with* data in **MARC 538 \$a**

This data *may be used in addition to* data in various fixed fields in **MARC 007**

347 **b**MP3

347 **e**region 1\$2rdare

347 **e**region A\$2rdare

NUMBERING OF SERIALS (RDA 2.6 - CORE)

Numbering of serials is the identification of each of the issues or parts of a serial. It may include a numeral, a letter, a character, or the combination of these with or without an accompanying caption (volume, number, etc.) and/or a chronological designation.

Record numbers expressed as numerals or as words applying the general guidelines given under 1.8. Transcribe other words, characters, or groups of words and/or characters **as they appear** on the source of information. Apply the general guidelines on transcription given under **RDA 1.7**. Substitute a slash for a hyphen, as necessary, for clarity.

Record the number for the first issue; if it has ceased publication, record the last issue.

If the numbering starts a new sequence with a different system, record the numbering of the first issue of each sequence and the numbering of the last issue of each sequence.

This data is **recorded** in **MARC 362 \$a**

MARC Examples

362 0\$a**Vol. 1, no. 1 (Apr. 1981)-**

362 0\$a**Vol. 1, no. 1 (Apr. 1983)-v. 1, no. 3 (June 1983)**

362 1\$a**Began with vol. 4, published in 1947.**

362 1\$a**Ceased with 2 (1964)**

SERIES STATEMENT (RDA 2.12)

A series statement is a statement identifying a series to which a resource belongs and the numbering of the resource within the series. A series statement may also include information identifying one or more subseries to which the resource being described belongs. Series statements may also include statements of responsibility relating to a series or subseries. The information relating to one series, or one series and one or more subseries, constitutes one series statement.

Title proper of series, numbering within series, title proper of subseries, and numbering within subseries are core elements. Other sub-elements of series statements are optional.

Transcribe the sub-elements of a series statement **as they appear** on the source of information. Apply the general guidelines on transcription given under **RDA 1.7**. If the resource belongs to more than one series and/or more than one series and subseries, record each series statement separately.

Title Proper of Series (RDA 2.12.2 - CORE)*

Title proper of series is the chief name of a series (i.e., the title normally used when citing the series). Take the title proper of a series from the following sources (in order of preference):

1. the series title page
2. another source within the resource itself (**RDA 2.2.2**)
3. one of the other sources of information specified under **RDA 2.2.4**

If the resource is issued in a series, record the title proper of the series applying the basic instructions on recording titles given under (**RDA 2.3.1**)

If the title proper of the series includes numbering as an integral part of the title, transcribe the numbering as part of the title proper of the series.

This data is **transcribed** in **MARC 490 \$a**

If the series is traced (i.e. first indicator is 1), this data is used *in conjunction with* data in **MARC 800, 810, 811, 830 \$a**

MARC Examples

490 1\$a**Uniform crime reports**

490 0\$a**Pelican books**

490 1\$a**The new series ;\$v#54**

490 1\\$\aLectures notes in biomathematics ;\\$v63.\\$aBrain theory subseries

490 1\\$\aThe complete organ works / Johann Sebastian Bach. Series II, Literature
;\\$volume 2

Numbering Within Series (RDA 2.12.9 - CORE)*

Numbering within series is a designation of the sequencing of a part or parts within a series. It may include a numeral, a letter, any other character, or the combination of these, with or without an accompanying caption (volume, number, etc.) and/or a chronological designation.

Take the numbering within a series from any source within the resource.

Record the numbering of the resource within the series **as it appears** on the source of information. Apply the general guidelines on transcription given under **RDA 1.7** and the general guidelines on numbers expressed as numerals or as words given under **RDA 1.8**.

If the resource has both a numeric and/or alphabetic designation and a chronological designation, record both. Do not treat a date of production, publication, distribution, or manufacture as a chronological designation. If the numbering consists of a year and a number that is a division of the year, record the year before the number.

When the numbering is grammatically integrated with the series title, apply the instructions given under **RDA 2.12.2.3**.

If the numbering that appears on the source of information is known to be incorrect, transcribe it **as it appears**. Make a note giving the correct numbering.

This data is **transcribed** in **MARC 490 \$v**

If the series is traced (first indicator is 1), this data is used *in conjunction with* data in **MARC 800, 810, 811, 830 \$v**

MARC Examples

490 1\\$\aPediatric clinics of North America ;\\$vv. 2, no. 4

490 1\\$\aDepartment of State publication ;\\$v7846.\\$aDepartment and Foreign Service series ;\\$v128

UNIFORM RESOURCE LOCATOR (URL) (RDA 4.6)

A Uniform Resource Locator includes all resource identifiers intended to provide online access to a resource using a standard Internet browser. Take information on a Uniform Resource Locator from any source. Record a Uniform Resource Locator from a related manifestation as part of the description of the related manifestation (see **RDA 27.1**).

This data is **recorded** in **MARC 856 \$u**

GENERAL NOTE

General notes contain information from a broad spectrum of description that isn't easily relegated to a more specific type of note. They are added for the purpose of adding clarification or useful information for the user. Notes can be taken from the resource itself or from outside the resource. General notes will most often fall into one of two categories: manifestation notes or carrier notes.

Manifestation Notes (RDA 2.17)

Manifestation notes convey information referring to shared characteristics of a particular published edition of a work. They provide additional clarifying information to any number of descriptive elements of a manifestation, which commonly are:

Title

- A note providing information on the source from which a title was taken, the date the title was viewed, variations in titles, inaccuracies, deletions, etc., or on other information relating to a title.

Statement of Responsibility

- A note providing information on an agent not named in a statement of responsibility to whom responsibility for the intellectual or artistic content of the resource has been attributed, on variant forms of names appearing in the resource, on changes in statements of responsibility, or on other details relating to a statement of responsibility.
- For the more specific Participant/Performer note, or Creation/Production Credits note, see their respective sections below.

Edition

- A note providing information on the source of an edition statement, on edition statements relating to issues, parts, etc., on changes in edition statements, or on other information relating to an edition statement.

Numbering of Serials

- A note providing information on the numbering of the first and/or last issue or part, on complex or irregular numbering including numbering errors, on the period covered by a volume, issue, part, etc., or on other information relating to numbering of serials.

Publication Statement (or Production/Distribution/Manufacture)

- A note providing details on a place of publication, a publisher's name, or a date of publication, or information on changes in the place of publication, publisher, or publisher's name.

Copyright Date

- A note providing information on copyright dates not recorded as part of the copyright date element.

Series Statement

- A note providing information on complex series statements, on incorrect numbering within series, on changes in series statements, or on other information relating to a series statement.

Identifier

- A note providing information on identifiers for the manifestation not recorded as part of the identifier for the manifestation element.

This data is **recorded** in **MARC 500 \$a**

MARC Examples

500 \\\$aThe word “Brain” in the title appears with an X through it.

500 \\\$aMiikka Tallavaara’s name is spelled “Tallaavaara” on title page.

500 \\\$aEdition statement in colophon varies: Shohan.

500 \\\$aVolume numbering irregular: v. 15–18 omitted, v. 20–21 repeated.

500 \\\$aProbable year of publication based on date range in which the publisher was active.

500 \\\$aCD-ROM is copyright 2001.

500 \\\$aPts. 1 and 2 in series: African perspective. Pts. 3 and 4 in series: Third World series. Pt. 5 in both series.

500 \\\$aISBN for set is incorrect in volume 1; volume 2 contains the correct ISBN.

Carrier Notes (RDA 3.21)

Carrier notes convey information referring to the physical medium in which data, sound, images, etc. are stored. They provide additional clarifying information to any number of descriptive elements of carriers, which commonly are:

Extent

- A note providing information on the extent of a manifestation that is not recorded as part of an extent element. This information might include: details of various pieces of the manifestation, irregular or duplicated pagination, and pagination forming part of a larger sequence.

Dimensions

- A note providing information on the dimensions of a manifestation that is not recorded as part of a dimensions element. This information might include: irregular dimensions, inconsistent dimensions, and changes in dimensions for continuing or integrating resources.

This data is **recorded** in **MARC 500 \$a**

MARC Examples

500 \\\$aIncludes headdress, beaded shirt, trousers, and moccasins.

500 \\\$aPages also numbered 501–828.

500 \\\$aLeaves are joined end to end and folded accordion style.

500 \\\$aPrinted area measures 30 × 46 cm.

500 \\\$aSize varies: September 1891–September 1893: 18 × 26 cm; October 1893–December 1894, 18 × 27 cm.

500 \\\$aFilm length: 4241.7 m.

SUPPLEMENTARY CONTENT NOTE (RDA 7.16)

Supplementary content updates or complements the primary content of an expression. Common examples include index, bibliography, appendix, discography, filmography, webliography, etc.; however, an index alone is **not** considered supplementary content, and is recorded as a general note instead. If bibliographical references are located together within the resource, include page numbers in parenthesis, but do **not** input square brackets around unnumbered pages or leaves. Take information on supplementary content from any source.

With respect to bibliographic citations and bibliographies, interpret the phrase "bibliographical references" to include all kinds of resources, including electronic resources; do not give any special treatment to, or provide special mention of, the latter if using this general bibliographical reference note.

This data is **recorded** in **MARC 504 \$a**

MARC Examples

504 \\\$a**Includes bibliographical references.**

504 \\\$a**Includes bibliographical references (pages 310-325) and index.**

504 \\\$a**Includes discography (page 117-118), filmography (page 119), and index.**

CONTENTS NOTE (RDA 25.1)*

This note contains titles of separate works/parts of an item or a table of contents. The field may also contain statements of responsibility and volume numbers or other sequential designations. The following guidance is taken from LC-PCC Policy Statement for RDA 25.1.1.3 under Formal Contents Notes (Structured Descriptions):

1. Record the title proper that appears in the source that provides the best identification; however, if the title appears on the title page, normally use the title page title; generally give other title information only when the title proper would be meaningless without it or when it would greatly enhance keyword searching.
2. When the contents listed have different statements of responsibility, generally record a first statement of responsibility for each title proper recorded in the contents note.
3. Generally omit prefatory and similar matter of little importance.
4. For publications in one volume:
 - a) Omit chapter and section numbering.
 - b) Use a space-dash-space to separate the components.
5. For publications in two or more volumes:
 - a) Give the volume designation that is found on the resource; separate the volume designation from the title by a period-space.
 - b) If the number of physical volumes differs from the number of bibliographic volumes, include the number of physical volumes within parentheses after the title (or after the title and statement of responsibility).

- c) Separate each volume with a space-dash-space; if the set is incomplete, put the space-dash-space before each title (other than the first) that is being recorded and leave four spaces for the missing volume; if two or more titles are being transcribed for one volume, apply the punctuation conventions from ISBD such that the titles by the same person, body, etc., are separated by a space-semicolon-space and titles by different persons, bodies, etc., are separated by a period-space.
- d) When some of the volumes in a multipart publication have their own titles and some of the volumes do not, and it is decided to make a formal contents note, use the statement "[without special title]" to represent the untitled volumes.

This data is **recorded** in **MARC 505 \$a \$r \$t**

MARC Examples

505 0\$aArea 1, Lone Pine to Big Pine -- Area 2, Bishop to Mammoth Lakes -- Area 3, June Lake to Bridgeport -- Area 4, White Mountains area.

RESTRICTION ON ACCESS NOTE (RDA 4.4)

This note is used to specify limitations placed on access to a manifestation or item. If appropriate, include the nature and duration of the restriction.

This data is **recorded** in **MARC 506 \$a**

MARC Example

506 \\\$aCan only be checked out and returned at owning library.

CREATION/PRODUCTION CREDITS NOTE (RDA 2.17.3)

This note provides information about the credits for individuals or organizations (other than members of a cast) who have participated in the artistic or technical production of the work to a significant degree.

This data is **recorded** in **MARC 508 \$a**

MARC Examples

508 \\\$aFilm editor, Martyn Down ; consultant, Robert F. Miller.

508 \\\$aMusic, Michael Fishbein ; camera, George Moore.

508 \\\$aPhotographer, Richard Beymer ; film editor, Charles Pavlich ; educational consultant, Roseanne Gillis.

508 \\\$aProducer, Joseph N. Ermolieff ; director, Lesley Selander ; screenplay, Theodore St. John ; music director, Michel Michelet.

PARTICIPANT/PERFORMER NOTE (RDA 2.17.3)

This note provides information about the participants, players, narrators, presenters or performers.

This data is *recorded* in **MARC 511 \$a**

MARC Examples

511 1\\\$aPrunella Scales (Helena), Van McKellen (Lysander), Miles Malleson (Quince) and the Marlowe Dramatic Society.

511 0\\\$aAnchor, Dan Rather.

511 0\\\$aHosted by Hugh Downs.

511 0\\\$aMarshall Moss, violin ; Neil Roberts, harpsichord.

511 0\\\$aNarrator: Burl Ives.

511 0\\\$aPresenter: Alfred Hitchcock.

511 0\\\$aVoices: Peter Ustinov, Cloris Leachman, Sally Kellerman, Andy Devine.

CAPTURE INFORMATION NOTE (RDA 7.11)

This note refers to a place, date, or other information associated with the recording, filming, etc., of the content of an expression. Record a *place* of capture by naming the specific studio, concert hall, etc., if applicable and readily ascertainable, and the city, etc. Record a *date* of capture by giving the year, month, day, and time, as applicable.

This data is *recorded* in **MARC 518 \$a**

MARC Examples

518 \\\$aFilmed on location in Rome and Venice from January through June 1976.

518 \\\$aBroadcast October 17, 1954 at 7:30 p.m. (PST).

518 \\\$aWorks on accompanying audio disc recorded 1955-1963 in various places.

518 \\\$a"Recorded in Memphis, Tennessee, October 3, 1959 by Samuel B. Charters" -- Container.

SUMMARIZATION OF CONTENT NOTE (RDA 7.10)

This note contains an abstract, summary, synopsis, etc., of the content of an expression. Record a summary from information on the manifestation or from another source. Use quotations if transcribed directly from the source.

This data is *recorded* in **MARC 520 \$a**

MARC Examples

520 \aKate and Ben follow their rabbit into a haunted house and discover the source of the house's ghostly sound.

520 \aBooks, ledgers, and letters of Alexander Gusdorf and his brother, Gerson Gusdorf, who ran a general store in Taos, N.M.

520 \aRecords the events, people, and places that made news in 2000 and updates the information from the encyclopedia's first year.

521 1\a"Combines the most frequently asked questions regarding AIDS with the most prominent US physician, former Surgeon General C. Everett Koop, resulting in an informative 38-minute production" --Video rating guide for libraries, winter 1990.

INTENDED AUDIENCE NOTE (RDA 7.7)*

This note refers to a category of user for which the content of a work is intended, or for whom the content is considered suitable. Record an intended audience if the information is stated on the manifestation or is readily available from another source.

This data is **recorded** in **MARC 521 \$a**

This data may be used *in addition to* the **Audn** fixed field, which is in **22** of **MARC 008**

MARC Examples

521 0\a3.1.

521 1\a008-012.

521 2\a7 & up.

521 3\aVision impaired\$afine motor skills impaired\$aaudio learner\$bLENOCA.

521 8\aMPAA rating: R.

521 8\aFor remedial reading programs.

521 \aJunior high school through college students and adults.

ADDITIONAL PHYSICAL FORM NOTE (RDA 27.1)

This note makes reference to a different physical or digital format in which the described item is available. This note is used only for notes describing different physical formats. Information about other editions (e.g., earlier versions, shorter versions, different language versions) is recorded in an original version note.

This data is **recorded** in **MARC 530 \$a**

This data *may be used in addition to* data in **MARC 776**

MARC Examples

530 \aAvailable on microfiche.

530 \\\\$a**Online version available via The New Bartleby Library**\\\$uhttp://www.bartleby.com/99_index.html

530 \\\\$a**Issued as Beta 1/2 in. or VHS 1/2 in. or U-matic 3/4 in.**

ORIGINAL VERSION NOTE (RDA 27.1)*

This note describes details of an earlier or original production of a work. The resource being cataloged may either be a reproduction (e.g., scanned image, or PDF), or an edition that is similar enough that it could serve as a surrogate for the original (e.g., HTML). It is used to describe details relevant to the original in a structured form when they differ from the information describing the reproduction.

The word “reproduction” is being used in its broadest sense to include all resources formerly identified as reproductions, republications, reprints, reissues, facsimiles, etc., that still represent equivalent content between an original resource and a reproduction of that original. Revised editions represent different expressions and are not treated as reproductions.

This data is **recorded** in **MARC 534 \$p \$c \$t**

This data *may be used in addition to* data in **MARC 775**, or **MARC 776**

MARC Examples

534 \\\\$p**Originally published:**\\\$c**New York : Harper & Row, 1972.**

534 \\\\$p**Originally published:**\\\$c**Berlin : Eulenspiegel, ©1978,**\\\$n**under title:**\\\$t**Lieder zu Stücken.**

534 \\\\$p**Originally published in English:**\\\$c**Garden City, N.Y. : Anchor Books, 1974-1978,**\\\$n**under title:**\\\$t**Anchor atlas of world history.**

SYSTEM DETAILS NOTE

This note contains various types of technical information for the resource being described. Such information includes the absence or presence of certain kinds of codes or the physical characteristics of a computer file such as blocking factors, mode of access, parity, recording densities, software programming language, computer requirements, peripheral requirements, trade name or recording systems, number of lines of resolution, and modulation frequency.

For **software**, record data such as computer requirements (e.g., computer manufacturer and model, memory requirements, or operating system), peripheral requirements (e.g., number of disk or drum units, number of tape drives, number of terminals, or other peripheral devices, support software, or related equipment) or software programming language.

For **sound recordings** and **videorecordings**, record information about the trade name or recording system(s) (e.g., VHS), modulation frequency, and number of lines of resolution.

Links to technical details relating to digital resources may also be recorded.

This data is **recorded** in **MARC 538 \$a**

This data is used *in conjunction with* data from **MARC 344, 345, 346, 347**

This data may be used in addition to data in various fixed fields in **MARC 007**

MARC Examples

538 \\\\$aSystem requirements: Mac OS X 10.7.5+ and Safari 6.0+, Windows Vista+ and Firefox 22+; DVD-ROM drive.

538 \\\\$aDVD ; NTSC, region 1, Full screen 1.33:1.

538 \\\\$aSystem requirements: CD/MP3 player or PC with MP3-capable software.

538 \\\\$aBlu-ray Disc; region A, B, C; 1080p high definition, wide screen (1.78:1) aspect ratio; DTS-HD master audio 7.1, Dolby Digital (5.1); requires Blu-ray player.

LANGUAGE OF CONTENT NOTE (RDA 7.12)*

This note contains textual information on the language or notation system used to convey the content of the described materials.

Record information about **accessibility content** according to instructions at **RDA 7.14** if the information is evident from the manifestation or is readily available from another source. This content includes accessible labels, audio description, captioning, image description, sign language, and subtitles.

This data is *recorded* in **MARC 546 \$a**

This data may be used *in addition to* data in **MARC 041 \$a - \$t**

MARC Examples

041 0\\\$aeng\$afre\$ager

546 \\\\$aText in English, French, and German.

041 1\\\$aeng\$hswe

546 \\\\$aText in English, translated from the Swedish.

041 0\\\$aeng\$asgn

546 \\\\$aOpen signed in American Sign language.

AWARDS NOTE (RDA 7.28)*

This note provides information about a formal recognition of excellence, etc., given by an award- or prize-granting body, for the content of an expression. Record information on an award if considered important for identification or selection. Take information on an award from any source.

This data is **recorded** in **MARC 586 \$a**

MARC Examples

586 \\\$a**Caldecott Medal, 1996**

586 \\\$a**American Library Association Stonewall Book Award for Nonfiction, 2002**

586 \\\$a**Academy Award: Best Documentary Feature, 2011**

586 \\\$a**Academy Award: Best Actress, Diane Keaton; Best Director, Woody Allen; Best Picture; Best Writing, 1978**

SOURCE OF DESCRIPTION NOTE (RDA 2.17.13)

This note is used for continuing resources and multipart items to identify the issue, part, or iteration used as the basis for identification of the resource. For online resources also include the date on which the resource was viewed for description.

If more than one issue or part has been consulted, make a separate note identifying the latest issue or part consulted in preparing the description.

This data is **recorded** in **MARC 588 \$a**

MARC Examples

588 0\\\$a**Volume 2, number 2 (February 1984); title from cover.**

588 0\\\$a**Online resource; title from pdf information screen (EBSCO, viewed November 19, 2013).**

** please see additional guidance for this element in the “Sage Specific Practices” portion of this manual.*

Access Points

Access Points

Any part of a bibliographic record that is searchable such as title, author, names, subjects, keywords, codes, or numbers.

Authorized Access Points

In a bibliographic record, the entities appearing in MARC 21 fields such as 1XX, 24X, 6XX, 7XX, and 8XX. Authorized access points must be constructed following a standard controlled language form using Library of Congress Authorities at <https://authorities.loc.gov/>.

Creators

Works created by persons, families, or corporate bodies

MARC Examples

100 1\ Personal name

100 3\ Family

110 2\ Corporate body

111 2\ Conference, meeting, event

Use for the following types of personal names:

- Names of persons
- Phrases having the structure of forenames or surnames
- Phrases used to indicate a person
- Names of families
- Persons named in sacred scriptures or apocryphal books
- Fictitious and legendary persons or characters
- Real non-human entities, such as named animals

Relationship Designators Part 1

Relationships between works, expressions, manifestations, or item and agents associated with the resource. These are listed in \$e, also called a relator term that identifies the relationship between a resource and associated agents. They provide specific information about the nature of the relationship and as many can be used to fully describe that relationship. They also require a controlled standard vocabulary. Authorized terms can be found at ([LOC](#)) or [Appendix B](#).

MARC Examples

100 1\ \$aDoodler, Todd H., \$e author, \$eillustrator.

100 1\ \$aGreen, Katie \$c(illustrator), \$eartist, \$eauthor.

100 1\ \$aHitchman, Virginia, \$e author, \$einterviewer, \$etranslator, \$e compiler, \$eeditor.

Personal name

Gives access to the bibliographic record using the author's name as listed in Library of Congress Name authority.

MARC Examples

- 100 1\\${a}Morrison, Tony,\$eauthor.
- 100 1\\${a}Walker, Alice,\$d 1944-\$eauthor.
- 100 0\\${a}John Paul\${b} II,\$c Pope,\$d1912-2005,\$eauthor.
- 100 1\\${a}King, Martin Luther,\$c Jr.,\$d1929-1968,\$eauthor.
- 100 1\\${a}Salinger, J. D.\$q(Jerome David),\$d1919-2010,\$eauthor.

Personal name (600) in a Subject Entry as listed in the Library of Congress Subject authority.

MARC Examples

- 600 00\${a}Joan,\$cof Arc, Saint,\$d1412-1431.
- 600 10\${a}Lincoln, Abraham,\$d1809-1865\$xAssissination.
- 600 10\${a}Williams, Serena,\$d1981-\$vJuvenile literature.
- 600 10\${a}Finn, Huckleberry\$c(Fictitious character)\$vFiction.

Personal name (700) in an Added Entry for contribution to a work as listed in the Library of Congress name authority including a \$e for their relator term

MARC Examples

- 700 0\\${a}Cher,\$d1946-\$eactor.
- 700 1\\${a}Possiel, Norman C.,\$eauthor.
- 700 1\\${a}Johnson, Scott Fitzgerald,\$d1976-\$etranslator.
- 700 1\\${a}McKean, Dave\$eillustrator.

Sometimes a Personal name 100 field will differ from the name on the work in hand. Mentors may be contacted in this event to add a 790 field (Sage specific) that is searchable for patrons.

MARC Examples

- 100 1\\${a}Lewis, Jacqueline Janette,\$d1959- \$eauthor.
- 790 1\\${a}Lewis, Jacqui.

- 100 1\\${a}Pak, Sang-yöng,\$d1988-\$eauthor.
- 790 1\\${a}Park, Sang Young

Personal name (800) in a Series Added Entry as listed in the Library of Congress Name/Title authority.

MARC Examples

800 1\\${a}Evanovich, Janet.\$tLizzy and Diesel novels.

800 1\\${a}McCaffrey, Anne.\$tDragonriders of Pern ;\$v03.

800 1\\${a}Robb, J. D.,\$d1950-\$tIn death novel ;\$v33.

Family (100, 600, 700) use for the name of a family, clan, dynasty, house, or other such group. The name may be constructed in direct or inverted order. Check authorities for standard form. The headings differ depending on their use, the 100 and 700 name headings often have different 600 subject entries.

MARC Examples

100 3\\${a}Wray (Family : \$gWray, Mary),\$ecompiler.

245 14\$aThe Mary Wray family recipe book /\$c compiled by the Mary Wray family.

100 3\\${a}Trapp (Family : Trapp, Agathe),\$eauthor,\$eillustrator.

245 10\$aMemories before and after The Sound of Music :\$bautobiography /\$cAgathe von Trapp; with illustrations by the author.

600 30\$aPremyslid dynasty.

600 30\$aNorfolk, Dukes of.

700 3\\${a}Dungill (Family : \$d1894-1999 : \$cChicago, Ill.),\$eeditor.

700 3\\${a}Jarvis (Family : \$gJarvis, George (George Franklin),1823-1913),\$eeditor.

700 3\\${a}Drake (Family : \$gDrake, Tom Patrick, 1879-1957),\$ecurator.

Corporate Name (110, 610, 710, 810) if the content of its work falls into the following categories (outlined below are some key points; for more detail, check the RDA rule).

- Works of an administrative nature.
- Works that record the collective thought of the body (reports of commissions, committees, etc.).
- Works that record hearings conducted by legislative, judicial, governmental, and other corporate bodies.
- Works that report the collective activity of conference, expedition, an event, exhibition).
- Works that result from the collective activity of a performing group.
- Cartographic works.

- Legal works.
- Named individual works of art by two or more artists acting as a corporate body.

MARC Examples

110 0\\$\aNewman (Jean and Dorothy) Industrial Relations Library.

110 2\\$\aJ.C. Penney Co.

610 10\\$\aUnited States.\\$bArmy.\\$bCavalry\\$xHistory\\$yCivil War, 1861-1865\\$vMaps.

610 20\\$\aEmpire State Building (New York, N.Y.)

710 1\\$\aUnited States.\\$tConstitution.\\$p13th Amendment.

710 2\\$\aAmblin Entertainment (Firm),\\$eproduction company.

810 2\\$\aLonely Planet Publications (Firm).\\$tLonely Planet city map series.

810 2\\$\aJohn Bartholomew and Son.\\$tBartholomew world travel series ;\\$v10.

Conference, Meeting, Event (111, 611, 711) assigned according to various cataloging rules to give access to the bibliographic record from meeting names. Use for the following types of meeting names:

- Athletic contests
- Conferences, colloquia, congresses, institutes, seminars, symposia, workshops
- Competitions
- Exhibitions
- Expositions
- Fairs, festivals
- Meetings
- Parades
- Scientific expeditions

MARC Examples

111 2\\$\aWyoming State Fair.\\$e4-H Club Department,\\$jauthor.

611 20\\$\aNational Independence Day Festival and Parade\\$xHistory\\$vSources.

711 2\\$\aWriters of the Future,\\$jauthor.

Title Statement (245) as it appears on the item and can be accessed with a title or keyword search. It is not a controlled vocabulary and is taken from the item in hand. It contains the title, subtitle, and statement of responsibility.

MARC Examples

245 10\$aMermaids in paradise :\$ba novel /\$cLydia Millet.

245 14\$aThe plays of Oscar Wilde /\$cAlan Bir.

245 10\$aHow to play chess /\$cKevin Wicker ; with a foreword by David Pritchard ; illustrated by Karel Feuerstein.

Preferred title (130, 240): used to bring together bibliographic entries for a work when various expressions or manifestations have appeared under different titles. It is also used to provide identification for a work when the title by which it is known differs from the title proper of a particular expression or manifestation, or when different works have identical titles. These are authorized access points.

Common examples of preferred titles entered directly include:

- Anonymous works
- Composite manuscripts or manuscript groups
- Concordats
- Journals and newspapers
- Motion pictures and video recordings
- Radio and television programs
- Sacred works
- Treaties and intergovernmental agreements

Main entry - Uniform title (130): a title used as the preferred access point. A preferred title entered under an authorized access point for a personal name in field 100, a corporate name in field 110, or a meeting name in field 111 is contained in field 240.

MARC Examples

130 0\$aKing Kong (Motion picture : 1933)

130 0\$aBeowulf.

130 0\$aQur'an.\$lEnglish

130 0\$aSan Francisco Journal (1980)

130 0\$aThree little pigs.

Uniform title (240): together with the name in fields 100, 110, or 111, the preferred title forms the authorized access point that identifies an item especially if it has appeared under varying titles. It also distinguishes similar works and expressions. Use field 130 for the preferred title that forms the authorized access point when no name is appropriate.

MARC Examples

100 1\ \$aBonhoeffer, Dietrich,\$d1906-1945,\$eauthor.

240 10\$aWorks.\$kSelections.\$lEnglish.\$f2014

100 1\ \$aAusten, Jane,\$d1775-1817,\$eauthor.

240 10\$aSense and sensibility

110 2\ \$aInter-American Commission on Human Rights.

240 10\$aInforme sobre la situación de los derechos humanos en Paraguay.\$lEnglish

245 10\$aReport on the situation of human rights in Paraguay.

100 1\ \$aGorman, Amanda,\$d1998-\$eauthor.

240 10\$aPoems.\$kSelections.

245 10\$aCall us what we carry :\$bpoems /\$cAmanda Gorman.

110 2\ \$aAustralian National Parks and Wildlife Service.

240 10\$aAnnual report (1977)

245 10\$aAnnual report /\$cAustralian National Parks and Wildlife Service.

Relationship Added Entries (7XX)

There are different kinds of relationship added entries that are needed to connect the information in a catalog record. Discussed before in Relationship Designators Part 1, was how agents relate to works/expressions/manifestations/items, which is Appendix I in the RDA toolkit (linked in [Appendix B](#)).

MARC Examples

245 04\$aThe proper way to meet a hedgehog :\$band other how-to poems /\$cselected by Paul B. Janeczko ; illustrated by Richard Jones.

700 1\ \$aJaneczko, Paul B.,\$eeditor.

700 1\ \$aJones, Richard,\$d1977-\$eillustrator.

100 1\1\$aCowell, Cressida,\$eauthor.

245 04\$aHow to train your dragon /\$cCressida Cowell ; read by David Tennant.

700 1\1\$aTennant, David,\$d1971-\$enarrator.

Relationship designators Part 2

There are also specific guidelines for the relationships between works, expressions, manifestations, and items, this is Appendix J in the RDA toolkit (linked in [Appendix B](#)). These relationship designators are used in 7XX \$i, these are considered analytical entries.

Relationship Added Entries Access Points (7XX \$i) links contained and related works.

MARC Examples

130 \0\$aKing Kong (Motion picture : 1976)

245 10\$aKing Kong /\$cDino De Laurentiis Corp. ; Paramount Pictures ; screenplay by Lorenzo Semple, Jr. ; produced by Dino De Laurentis ; directed by John Guillermin.

730 02\$i**Remake of (work)**\$aKing Kong (Motion picture : 1933)

100 1\1\$aLaird, Jenny,\$d1969-\$eadapter.

245 10\$aMary Pope Osbourne's magic tree house.\$n1,\$pDinosaurs before dark /\$cadapted by Jenny Laird ; with art by Kelly and Nichole Matthews.

700 12\$i**Adaptation of (work):**\$aOsborne, Mary Pope.\$tDinosaurs before dark.

100 1\1\$aPak, Greg, \$eauthor.

245 10\$aFirefly.\$pNew sheriff in the 'verse.\$nPart two /\$ccreated by Joss Whedon ; written by Greg Pak ; illustrated by Lalit Kumar Sharma, Ramon Bachs (chapter four), Daniel Bayliss (chapter eight) ; colored by Francesco Segala, Joana Lafuente (chapter ten) ; lettered by Jim Campbell.

730 02\$i**Based on (work):**\$aFirefly (Television program)

Whole-Part Relationships

Whole-part relationships are used for collected works (e.g. anthologies, short story collections, DVD compilations, etc.). It's important to list the individual works that are contained in the overall work that's being cataloged. It is important to note that \$i and \$e are never used in the same entry.

MARC Examples

100 1\1\$aRoberts, Nora,\$eauthor.

245 10\$aCordina's royal family /\$cNora Roberts.

700 12\$acontainer of (work):\$aRoberts, Nora.\$tAffaire royale.

700 12\$acontainer of (work):\$aRoberts, Nora.\$tCommand performance.

700 12\$acontainer of (work):\$aRoberts, Nora.\$tPlayboy prince.

245 00\$aExiled /\$cS.M Stirling, Harry Turtledove, Jody Lynn Nye, John Ringo, Michael Z. Williamson.

700 12\$acontainer of (work):\$aTurtledove, Harry.\$tMrem go west.

700 12\$acontainer of (work):\$aStirling, S. M.\$tLittle power.

700 12\$acontainer of (work):\$aWilliamson, Michael Z.\$tBattle's tide.

700 12\$acontainer of (work):\$aNye, Jody Lynn,\$d1957-\$tCata.

245 04\$aThe Incredibles ;\$bIncredibles 2 /\$cWalt Disney presents a Pixar Animation Studios film.

730 0\$acontainer of (work):\$aIncredibles (Motion picture)

730 0\$acontainer of (work):\$aIncredibles 2 (Motion picture)

Other Edition Entries

These entries are information about other available editions that have a horizontal relationship with the work and are used for the following types of editions:

- **Language editions.** When an item is issued simultaneously in more than one language by the same publisher, rather than an edition issued by another publisher, use field 775.
- **Regular-print editions.** When the item being cataloged is a regular-print reprint, use field 775 for the original entry.
- **Other editions.** Use field 775 for other editions of the target item. These editions will generally bear the same title as the target item, but have edition information that distinguishes them.

MARC Examples

Sage Specific Practices

These are consortium cataloging practices that are done for consistency in records. These are specific to Sage and are within cataloging guidelines.

Importing records

When cataloging materials it is necessary to import records when there is not a matching record in Evergreen. Records can be imported from different places (z39.50, Connexion, etc.) with z39.50, the ISBN is used to find matching records. There could be one to several results, the available records should be looked through to see which is the most complete record and up to RDA standards. If the only records available are cataloged using AACR2 they must be made RDA compliant before or right after import.

Records already in Evergreen that are in AACR2 encoding do not need to be updated to RDA but it is helpful.

Title access point (Title statement)

When transcribing information from the item, use sentence case. Even if the information on the item is in ALL CAPITAL LETTERS, it is Sage practice to convert that information into sentence case. So it is only appropriate to capitalize the first letter and proper nouns.

Never

The animal book

Saving planet

Usually the title access point is transcribed from the material, it is a very rare case where it is not. When cataloging books, the title access point is always transcribed from the title page, a Sage specific practice when transcribing this information is to not include the series information unless: (a) it is integral to the title or (b) it is a graphic novel/manga.

MARC Examples

245 10\$aHot to trot /\$cM.C. Beaton with R. W. Green.

Regular novel

Graphic novel

245 14\$aThe Umbrella Academy.\$nVolume 3, \$pHotel Oblivion / \$cstory, Gerard Way ; art, Gabriel Bá ; colors, Nick Filardi ; letters, Nate Piekos of BlamBot.

Variant title access point (Variant title)

Though optional under RDA, this is required for Sage catalogers.

MARC Examples

245 10\$aThree men and a baby.

246 30\$a3 men and a baby

245 10\$Please don't stab me!Please do not stab me! :\$bhow to tuck a gangster into bed and other true stories /\$cStephan Friedrich.

246 30\$aPlease do not stab me!

Creating additional access points

When cataloging materials that contain separate titles (i.e. DVD compilations, anthologies, or short story collections) it is required to create additional access points with this information. With the configuration of the catalog it is necessary to put the information in multiple places to make it accessible and complete for patrons and fellow staff. Make sure to use proper authorities when recording the additional access points.

Example

245 00 Besseling Jane Austen / Mary Balogh, Colleen Gleason, Susan Krinard, Janet Mulaney.

505 00\$tAlmost persuaded /\$rMary Balogh --\$tNorthanger castle /\$rColleen Gleason -- \$tBlood and prejudice /\$rSusan Krinard --\$tLittle to hex her /\$rJanet Mullany.

700 12\$iContainer of (Work):\$aBalogh, Mary.\$tAlmost persuaded.

700 12\$iContainer of (Work):\$aGleason, Colleen.\$tNorthanger castle.

700 12\$iContainer of (Work):\$aKrinard, Susan.\$tBlood and prejudice.

700 12\$iContainer of (Work):\$aMullany, Janet.\$tLittle to hex her.

Access points without authorized authorities

There are a few instances where it is necessary to create access points that do not come from an authorized source, this can happen with name, series and title authorities. This never happens with subjects, only use the existing authorities.

Title

When cataloging items where it is important to include additional title access points (that is not a variant title access point), these are usually items that require an enhanced 505 and that do not have authority entries in LOC, you should still create that 7XX access point. The title should be included in a \$t as it is on the item, excluding the beginning: a, an, or the. See creating additional access points section for an example.

Series

Creating series access points is somewhat fairly common since LOC inconsistently adds to the series authority database. Always check to make sure a series heading doesn't exist in the LOC authorities and then do a Sage search and if there are no entries, it is appropriate to create one from an established series resource (e.g. Goodreads, Fantastic fiction, Novelist).

Example

245 14 \$aThe curse of the werepenguin /\$cAllan Woodrow ; illustrated by Scott Brown.

500 \ \$aSeries information from Goodreads.

800 1\ \$aWoodrow, Allan. \$tWerepenguins ;\$v01.

Name

When a name access point doesn't exist, whether that is a person, business, or a meeting name, that is important for discovery; it should be created and added to the record. Always check LOC before creating access points and add identifying information if needed for differentiation.

Example

245 10 \$aFoxes, vulpine fluffy floofers / \$cRory Sofia Thompson.

No authority in LOC is appropriate so adding the middle name to the main entry access point is important.

Example

100 1\ \$aThompson, Rory Sofia, \$eauthor.

Language note

If an item is a translation, bilingual, or has subtitles in English or another language, it should have the language information noted in the record. This is a required Sage practice to include all the language information and we do use a specific format with how this information is recorded.

Examples

Translated book:

041 1\ \$aeng \$hjpn

546 \ \$aln English, translated from the Japanese.

Foreign film:

=041 1\ \$aeng\$aspa\$jspa\$jeng\$jpor\$heng

=546 \ \$aSoundtrack in English and dubbed in Spanish. Subtitles in English, Spanish and Portuguese.

Foreign film:

=041 1\\$\\$aspa\$jspa\$jeng\$heng

=546 \\\\$aSoundtrack is dubbed in Spanish. Subtitles in English and Spanish.

Original version note versus 765 & 775

A lot of times when importing records that are older, the previously and originally published information is in a 500 note. With RDA, this information should be recorded in either a 534 or in the appropriate 76X-78X fields. For purposes of display, Sage has been using 534 for all originally published information, including translations. As RDA is developed more relationships are being broken out into other linking fields but for now using 534 for all original version information is a Sage practice. Sage also converts first published to Originally published:. Do NOT delete any 76X-78X notes that may be in records, even if the information is repeated in those fields.

Glossary/RDA definitions/Terms, Etc.

A-B-C-D-E-F-G-H-I-J-K-L-M-N-O-P-Q-R-S-T-U-V-W

A

Access point - A name, term, code, etc., representing a specific entity.

Adaptation - A new derivative work created by revision of a previously existing work that substantially changes the nature and content of that work.

Agent - A person, family, or corporate body.

Alternative title - A second part of a title proper that consists of two parts, each of which has the form of an independent title, joined by a word such as "or" or its equivalent in another language.

Analog - A type of recording in which the content is stored as continuous variable quantities in or on the media.

Analytical description - A description that describes a part of a larger manifestation. Analytical description includes a description for a single volume of a three-volume biography, a single map forming part of a map series, etc.

Archival resource - A document or documents organically created, accumulated, or used by an agent in the course of the conduct of affairs and preserved because of their continuing value.

Aspect ratio - A numerical ratio of the width to the height of a moving image.

Aspect ratio designation - A general designation of the ratio of the width to the height of a moving image.

Audio - A media type used to store recorded sound, designed for use with a playback device such as a turntable, audiocassette player, CD player, or MP3 player. Media used to store digitally encoded as well as analog sound are included.

Audio description - A narrative text, read out loud by a human being or by voice synthesis, that succinctly explains visual details not apparent from the audio element of the expression.

Audio disc - A carrier type consisting of a disc on which sound waves, recorded as modulations, pulses, etc., are incised or indented in a continuous spiral groove.

Audio file - A file type for storing electronically recorded audio content.

Audio recording - A recording on which sound vibrations have been registered by mechanical or electrical means so that the sound may be reproduced.

Author - An agent responsible for creating a work that is primarily textual in content, regardless of media type or genre. Creation of a new work by paraphrasing, rewriting, or adapting works by another creator, if the modification has substantially changed the nature and content of the original or changed the medium of expression, is included.

Authorized access point - A standardized access point representing an entity.

Award - A formal recognition of excellence, etc., given by an award- or prize-granting body, for the content of an expression.

B

Biennial - A frequency for a manifestation issued or updated once every two years.

Bimonthly - A frequency for a manifestation issued or updated once every two months.

Biweekly - A frequency for a manifestation issued or updated once every two weeks.

Broadcast standard - A system used to format a manifestation of a video for television broadcast.

C

Carrier - A physical medium in which data, sound, images, etc., are stored. For certain types of manifestations, the carrier may consist of a storage medium sometimes encased in a plastic, metal, etc., housing that is an integral part of the manifestation.

Chart - A unit of extent consisting of a two-dimensional representation of data in graphic or tabular form. This term applies to still images.

Collection - A group of resources assembled by an agent from a variety of sources.

Compiler - An agent responsible for creating a new work such as a bibliography or a directory by selecting, arranging, aggregating, and editing data, information, etc. Revising or clarifying the content, or selecting and putting together works or parts of work, by one or more creators is excluded.

Container - A housing that is physically separable from the carrier being housed. A container includes a box for a disc or videocassette, a sleeve for a videodisc, etc.; an insert visible through the housing is part of the container.

Content type - A categorization reflecting the fundamental form of communication in which the content is expressed and the human sense through which it is intended to be perceived. Content type also reflects the number of spatial dimensions and the presence or absence of movement in which content expressed in the form of an image or images is intended to be perceived.

Conventional collective title - A title used as a preferred title for a compilation containing two or more works by one agent, or two or more parts of a work.

Copyright date - A date associated with a claim of protection under copyright or a similar regime. Copyright dates include phonogram dates, that is, dates associated with claims of protection for audio recordings.

Core element – An element considered essential or requisite in RDA. A core element supports fundamental, basic user tasks. The RDA core elements, a subset of the complete RDA set, provide the minimum data required for bibliographic and authority records.

Core-if element – An element considered to be core or required in RDA only if a particular situation applies.

Corporate body - An organization or group of persons and/or organizations that is identified by a particular name and that acts, or may act, as a unit.

Cover - An outer protective material attached to a volume, consisting of both sides of the front and back panels and the spine to which they are joined.

Creator - An agent responsible for the creation of a work. Creators include agents who are jointly responsible for the creation of a work either performing the same role, such as in a collaboration

between two writers, or performing different roles, such as in a collaboration between a composer and a lyricist.

D

Date of publication - A date associated with the publication, release, or issuing of a manifestation.

Derivative work relationship - A work that is based on or is a derivative of another work. Derivative works include summaries, abstracts, digests, adaptations, dramatizations, novelizations, screenplays, free translations, paraphrases, imitations, parodies, etc.

Description - A set of data recording and identifying an entity.

Designation - A word or phrase that describes an aspect of an entity.

Devised title - A title proper created by an agency preparing a description of a manifestation that bears no title itself and has no title associated with it that can be found in accompanying material, a published description of the manifestation, a reference source, etc.

Digital - A type of recording in which the content is continuously sampled and a sequence of discrete binary values is stored to represent the amplitude of each sample in the waveform.

Digital resource - A resource, consisting of data and/or one or more programs, encoded for manipulation by a computerized device. The resource may require the use of a peripheral device directly connected to a computerized device, an application program, and/or a connection to a computer network.

Dimensions - A measurement of a carrier or a container of a manifestation. Dimensions include measurements of height, width, depth, length, gauge, and diameter.

Duration - A playing time, performance time, running time, etc., of the content of an expression.

E

Editor - An agent contributing to an expression of a work by revising or clarifying the content, or by selecting and putting together works, or parts of works, by one or more creators. Addition of an introduction, notes, or other critical matter, or preparing an expression of a work for production, publication, or distribution is included. Major revision, adaptation, etc., that substantially changes the nature and content of the original work, resulting in a new work, is excluded.

Element - A word, character, or group of words and/or characters representing a distinct unit of bibliographic information.

Expression - An intellectual or artistic realization of a work in the form of alpha-numeric, musical or choreographic notation, sound, image, object, movement, etc., or any combination of such forms.

Extent - A number and type of unit and/or subunit of a manifestation.

F

Facsimile - An illustrative content consisting of an exact copy of an original, usually in the same dimensions as the original, especially of books, documents, prints, and drawings. Today the original is often reproduced photographically or digitally; in the past, it was reproduced by engraving or other printmaking process.

File type - A general type of data content encoded in a computer file.

Form - An illustrative content consisting of labeled areas for recording structured data to be input by specified persons for specific purposes, usually accompanied by prompts and guidance.

Fortnightly - see **Biweekly**

Frequency - An interval at which an issue or part of a serial or an update to an integrating resource is issued.

Full screen - An aspect ratio designation for a moving image resource of less than 1.5:1.

Fuller form of name - A name or names associated with a person that includes the fuller form of a part of any name represented only by an initial, abbreviation, or shortened or otherwise modified variant in the form chosen as the preferred name and/or a part of the name not included in the form chosen as the preferred name.

G

Genealogical table - An illustrative content consisting of a table or diagram representing the lineage of a person or family.

Graph - An illustrative content consisting of a diagram showing relative quantitative and qualitative aspects of a data set.

H

Hierarchical description - A description that combines a comprehensive description of the whole manifestation with analytical descriptions of one or more of its parts.

Hybrid catalog – A local catalog that has a mixture of bibliographic and authority records that were created under different cataloging rules. For instance, some records prepared with AACR2 rules and some prepared with the RDA instructions in the same local catalog.

I

Identifier for expression - A character string uniquely associated with an expression, or with a surrogate such as an authority record for an expression. An identifier serves to differentiate an expression from other expressions.

Identifier for manifestation - A character string associated with a manifestation that serves to differentiate a manifestation from other manifestations. An identifier for the manifestation includes registered identifiers from internationally recognized schemes, other identifiers assigned by publishers and others following internally devised schemes, identifiers known as fingerprints constructed by combining groups of characters from specified pages of early printed resources, publisher's numbers for notated music, and plate numbers for notated music.

Illumination - An illustrative content consisting of adornments, usually in one or more colors and applied by hand to an item using paint, ink, or metal foil.

Illustration - An illustrative content consisting of a still image.

Illustrative content - A presence of image content that accompanies the primary content of an expression. Tables containing only words and/or numerical data are excluded.

Illustrator - An agent contributing to an expression of a work by supplementing the primary content with drawings, diagrams, photographs, etc. Creation of content that is primarily artistic is excluded.

Image file - A file type for storing electronically recorded content representing still images.

Integrating resource - A mode of issuance of a manifestation that is added to or changed by means of updates that do not remain discrete but are integrated into the whole. A loose-leaf manual that is updated by means of replacement pages, a website that is updated continuously, etc., are included.

Irregular - A frequency for a manifestation issued with no consistent interval between issues.

ISBD – The acronym for International Standard Bibliographic Description created to improve the sharing of bibliographic records between countries.

Issuing body - An agent issuing a work, such as an official organ of the body.

Item - A single exemplar or instance of a manifestation.

J

Jacket - A detachable, protective wrapping of a volume, issued as part of a manifestation by a publisher, etc.

K

Key title - A unique name assigned to a manifestation by an ISSN registration agency.

L

Large print - A font size designed to aid readers who experience difficulty reading regular print.

Laser optical - A video format for optical disc that is read by a laser.

Layout - An arrangement of text, images, tactile notation, etc., in a manifestation.

Leaf - A unit of extent consisting of a single bound or fastened sheet as a subunit of a volume; each leaf consists of two pages, one on each side, either or both of which may be blank.

Longitude and latitude - A system for identifying the area covered by the cartographic content of a work using longitude of the westernmost and easternmost boundaries and latitude of the northernmost and southernmost boundaries.

M

Magnetic - A recording medium that relies on pole reversal in a ferromagnetic medium, typically ferromagnetic oxide particles bound to a tape or a disc.

Magneto-optical - A recording medium that uses a combination of laser heating with a varying magnetic field to write data to a disc.

Manifestation - A physical embodiment of an expression of a work.

Media type - A categorization reflecting the general type of intermediation device required to view, play, run, etc., the content of a manifestation.

Microfiche - A carrier type consisting of a sheet of film bearing a number of microimages in a two-dimensional array.

Microfilm - A film bearing a number of microimages in linear array.

Mirror site - A manifestation that is an exact copy of a website, used to reduce network traffic or improve the availability of the content of the original site.

Mixed aspect ratio - An aspect ratio designation for a moving image resource that includes multiple aspect ratios within the same resource.

Mode of issuance - A categorization reflecting whether a manifestation is issued in one or more parts, the way it is updated, and whether its termination is predetermined or not.

Mono - A configuration of playback channels consisting of a single channel for monophonic sound.

Monochrome - A color content consisting of tones of one color, or black and white, or black or white and another color.

Monograph - A resource that is complete in one part or intended to be completed within a finite number of parts.

Multilevel description - A form of presentation, in an ISBD display, of descriptive data based on the division of information into two or more levels. The first level contains information common to the whole or main resource. The second and subsequent levels contain information about an individual part.

Multipart monograph - A mode of issuance of a manifestation issued in two or more parts, either simultaneously or successively, that is complete or intended to be completed within a finite number of parts. A dictionary in two volumes, three audiocassettes issued as a set, etc., are included.

N

Negative - A polarity in which colors and tones used for images are opposite those seen with the human eye.

Nomen - A designation that refers to an RDA entity. A designation includes a name, title, access point, identifier, and subject classification codes and headings.

NTSC - A broadcast standard that is an analogue broadcast television system that was used in most of the Americas and areas of the Far East, named after the National Television System Committee.

Numbering of serials - A designation for each of the issues or parts of a serial. Numbering includes a numeral, a letter, any other character, or the combination of these with or without an accompanying caption and/or a chronological designation.

Numbering within series - A designation of the sequencing of a part or parts within a series. Numbering includes a numeral, a letter, any other character, or the combination of these with or without an accompanying caption and/or a chronological designation.

O

Object - A carrier type consisting of a three-dimensional artifact, a replica of an artifact, or a naturally-occurring object.

Online resource - A carrier type consisting of a digital resource accessed by means of hardware and software connections to a communications network.

Optical - A recording medium for recording binary encoded data in a transparent medium with a reflective backing. A laser is used to read the changes in reflectivity as a binary data stream.

Other title information - A word, character, or group of words or characters that appears in conjunction with, and is subordinate to, a title proper of a manifestation.

P

PAL - A broadcast standard that is a color encoding system for analogue broadcast television used in most countries broadcasting at 625-line / 25 frame per second, named after Phase Alternating Line.

Parallel title proper - A title proper in another language or script. An alternative title in another language or script is treated as part of a parallel title proper.

Plan - An illustrative content consisting of a detailed drawing or diagram.

Plate - A leaf, usually containing illustrative content, that does not form part of either the preliminary or the main sequence of pages or leaves.

Playing speed - A speed at which an audio carrier must be operated to produce the sound intended.

Polychrome - A color content consisting of two colors, neither of which is black or white, or more than two colors.

Portrait - An illustrative content consisting of a representation of an individual or group of persons or animals that is intended to capture a known or supposed likeness, especially the face of the individual.

Positive - A polarity in which colors and tones used for images are the same as those seen with the human eye.

Preferred name - A name or form of name chosen as the basis for an authorized access point representing an entity.

Preferred title for work - A title or form of title chosen to identify a work. The preferred title is also the basis for an authorized access point representing that work.

Production company - A corporate body that is responsible for financial, technical, and organizational management of a production for stage, screen, sound recording, television, webcast, etc.

Program file - A file type for storing electronically recorded programs consisting of organized lists of instructions to be executed by computer software.

Projection speed - A speed at which a projected carrier must be operated to produce the moving image intended.

Pseudonym - A name used by a person, either alone or in collaboration with others, that is not the person's real name.

Publication statement - A statement identifying a place or places of publication, publisher or publishers, and date or dates of publication of a manifestation. Publication statements include statements relating to the publication, release, or issuing of a manifestation.

Publisher - An agent responsible for publishing, releasing, or issuing a manifestation.

Q

Quadraphonic - A configuration of playback channels consisting of four channels for quadraphonic sound.

Quarterly - A frequency for a manifestation issued or updated once every three months.

R

RDA entity - An abstract class of key conceptual objects in the universe of human discourse that is a focus of interest to users of RDA metadata in library information systems. An RDA entity includes an agent, collective agent, corporate body, expression, family, item, manifestation, nomen, person, place, time-span, and work.

Record (audio/video) - To render (sound or images) into permanent form for reproduction, as by mechanical or digital means.

Record (data) - To capture information from a resource.

Recording medium - A type of medium used to record sound on an audio carrier.

Reference - A direction from one access point to another.

Regional encoding - A designation for one or more regions of the world for which a videodisc or video game carrier has been encoded, indicating that playback is restricted to a device configured to decode it.

Relationship designator - A designator that indicates the nature of a relationship between entities represented by authorized access points, descriptions, and/or identifiers.

Reproduction - An exact copy of the content of a manifestation or item made by mechanical or electronic means.

Resolution - A clarity or fineness of detail in a digital image, expressed by the measurement of the image in pixels, etc.

Resource - A work, expression, manifestation or item. A resource can be an individual entity, an aggregate, or a component of such an entity. It can be a tangible or intangible entity.

Running title - A title, or abbreviated title, that is repeated at the head or foot of each page or leaf.

S

Script - A set of characters and/or symbols used to express written language content of an expression.

SECAM - A broadcast standard that is a color encoding system for analogue broadcast television first used in France, named after Séquentiel couleur avec mémoire.

Semiannual - A frequency for a manifestation issued or updated twice every year.

Semimonthly - A frequency for a manifestation issued or updated twice every month.

Semiweekly - A frequency for a manifestation issued or updated twice every week.

Sequel - A later work that continues the narrative of an earlier work.

Serial - A mode of issuance of a manifestation issued in successive parts, usually bearing numbering, that has no predetermined conclusion. A serial includes a periodical, monographic series, newspaper, etc. Reproductions of serials and resources that exhibit characteristics of serials, such as successive issues, numbering, and frequency, but whose duration is limited, such as newsletters of events, are also included.

Series - A group of separate manifestations related to one another by the fact that each manifestation bears, in addition to its own title proper, a collective title applying to the group as a whole with or without numbering or, a separately numbered sequence of volumes or issues within a series or serial.

Series statement - A statement identifying a series to which a manifestation belongs and a numbering of a manifestation within the series. A series statement may also include information identifying one or more subseries to which the resource being described belongs. A series statement sometimes includes statements of responsibility relating to a series or subseries.

Series title page - An added title page bearing a series title proper and usually, though not necessarily, other information about a series such as statement of responsibility, numeric designation, data relating to publication, title of the manifestation within the series.

Sound characteristic - A technical specification relating to the encoding of sound in a manifestation.

Source of information - A source of data from which a description, or portion thereof, is prepared.

Special playback characteristic - An equalization system, noise reduction system, etc., used in making an audio recording.

Spoken word - A content type consisting of content expressed through language in an audible form. Recorded readings, recitations, speeches, interviews, oral histories, etc., computer-generated speech, etc., are included.

Statement of responsibility - A statement relating to the identification or function of agents responsible for the creation of, or contributing to the realization of, the intellectual or artistic content of a

manifestation. A statement of responsibility sometimes includes words or phrases that are neither names nor linking words.

Stereo - A configuration of playback channels consisting of two channels for stereophonic sound.

Still image - A content type consisting of content expressed through line, shape, shading, etc., intended to be perceived visually as a still image or images in two dimensions. Drawings, paintings, diagrams, photographic images known as stills, etc., are included. For cartographic content intended to be perceived as a two-dimensional image, see *cartographic image*. For images intended to be perceived through touch, see *tactile image*.

Storage medium - A physical material or substance on which information or artistic content is stored.

Structured description - A full or partial description of a related entity using the same data that would be recorded in RDA elements for a description of that related entity presented in an order specified by a recognized display standard.

Subject - A term, phrase, classification number, etc., that indicates what a work is about.

Subject relationship - A relationship between a work and an identifier, an authorized access point, or a description that indicates what a work is about.

Subseries - A series within a series, that is, a series that always appears in conjunction with another, usually more comprehensive, series of which it forms a section. Its title may or may not be dependent on the title of the main series.

Subtitle - A text displayed at the bottom of a moving image expression that is a translation or transcription of the dialogue or narrative.

Summarization of content - An abstract, summary, synopsis, etc., of the content of an expression.

Surround - A configuration of playback channels consisting of more than four channels for surround sound.

T

Tactile image - A content type consisting of content expressed through line, shape, and/or other forms, intended to be perceived through touch as a still image in two dimensions.

Tactile text - A content type consisting of content expressed through a form of notation for language intended to be perceived through touch. Braille text and other tactile forms of language notation are included.

Text - A content type consisting of content expressed through a form of notation for language intended to be perceived visually. All forms of language notation other than those intended to be perceived through touch are included.

Three-dimensional form - A content type consisting of content expressed through a form or forms intended to be perceived visually in three- dimensions. Sculptures, models, naturally occurring objects and specimens, holograms, etc., are included. Excludes cartographic content intended to be perceived as a three-dimensional form. Excludes three-dimensional forms intended to be perceived through touch.

Title - A word, character, or group of words or characters that names a manifestation or a work embodied in it.

Title page - A page at the beginning of a manifestation bearing a title proper and usually, though not necessarily, a statement of responsibility and data relating to publication. Facing pages or pages on successive leaves containing this information with or without repetition are considered collectively as a title page.

Title proper - A chief name of a manifestation, that is, a title normally used when naming a manifestation. An alternative title is treated as part of a title proper.

Title screen - A display of data about a digital manifestation that includes a title proper and usually, though not necessarily, a statement of responsibility and data relating to publication.

Track configuration - A configuration of the audio track on a sound-track film.

Transcribe - To capture information as it appears or is presented on a resource.

Two-dimensional moving image - A content type consisting of content expressed through images intended to be perceived to be moving, and in two dimensions. Motion pictures using live action and/or animation, film and video recordings of performances, events, etc., other than those intended to be perceived in three dimensions, are included. Moving images may or may not be accompanied by sound.

U

U-matic - A video format for analogue tape developed for professional use by Sony in 1969.

Uniform Resource Locator - An address of an online resource. A Uniform Resource Locator includes all manifestation identifiers intended to provide online access to a manifestation using a standard Internet browser.

Unmediated - A media type used to store content designed to be perceived directly through one or more of the human senses without the aid of an intermediating device. Media containing visual and/or tactile content produced using processes such as printing, engraving, lithography, etc., embossing, texturing, etc., or by means of handwriting, drawing, painting, etc., are included. Media used to convey three-dimensional forms such as sculptures, models, etc., are also included. Also includes media used to convey three-dimensional forms such as sculptures, models, etc.

Unstructured description - A full or partial description of an entity written as a phrase, sentence, paragraph, etc.

Updating loose-leaf - An integrating resource that consists of one or more base volumes updated by separate pages that are inserted, removed, and/or substituted.

V

Variant name - A name or form of name by which an entity is known that differs from the name or form of name chosen as a preferred name for that entity.

Variant title - A title associated with a manifestation that differs from a title recorded as a title proper, a parallel title proper, other title information, parallel other title information, earlier title proper, later title proper, key title, or abbreviated title.

VHS - A video format for analogue tape developed for consumer use by JVC in the 1970s.

Video - A media type used to store moving or still images, designed for use with a playback device such as a videocassette player or DVD player. Media used to store digitally encoded as well as analog images are included.

Video file - A file type for storing electronically recorded content representing moving images.

Video format - A standard, etc., used to encode the analog video content of a manifestation.

Video tape - A length of magnetic tape on which are recorded electrical signals that can be converted to images using video playback equipment.

Videodisc - A carrier type consisting of a disc on which video signals, with or without sound, are recorded.

Volume - A carrier type consisting of one or more sheets bound or fastened together to form a single unit.

W

Weekly - A frequency for a manifestation issued or updated once every week.

WEMI – An acronym for the FRBR Group 1 entities work, expression, manifestation, and item.

Whole-part work relationship - A work that is contained in or contains another work. Parts of works include discrete components such as subseries, and individual poems, stories, or essays in a collection or anthology.

Wide screen - An aspect ratio designation for a moving image resource of 1.5:1 or greater.

Work - A distinct intellectual or artistic creation, that is, the intellectual or artistic content.

Z

Z39.50 – A national and international (ISO 23950) standard defining a protocol for computer-to-computer information retrieval.
